CAPTAIN WILKINS DESCRIBES POLAR FLIGHT

START ON ICE RUNWAY WAS DANGEROUS FEAT

RUNWAY FIVE-EIGHTHS MILE
LONG AND ONLY 13 FEET
WIDE

MODERN AIR EXPLORERS PASS-
ED WITHIN 300 MILES
OF POLE

(Copyright, 1928, by United Press)
Green Harbor, Svalbard (Spitz-
bergen), April 23.—Captain George
Hubert Wilkins started from Point
Barrow, Alaska, April 15, at 10 o'-
clock Alaska time (presumably 10
A. M.)

He was obliged to change his
starting point because the runway
was too short for the heavily loaded
monoplane which weighs about
1,800 pounds when empty and 3,600
pounds when loaded.

The weight of the plane necessi-
tated a runway of about five-eighths
of a mile to achieve a speed of 80
kilometers (50 miles) an hour, so
that the plane could rise.

The newly selected starting point
was bad because of loose snow which
had to be hardened.

That was done only to a width of
four meters (about 13 feet) so Lieut.
Carl B. Eielson, pilot of the Arctic
plane, was obliged to steer carefully.
The ice was very uneven, adding to
the danger of the start.

Captain Wilkins passed the places
where Dr. Cook and Admiral Peary
presumably had been and sighted
Grant Land.

The modern air explorers passed
about 300 miles from the North
Pole. The weather was fine then,
although a little foggy. The plane
flew at a height of 1,000 feet and
was obliged to rise a few times.

Occasionally it was necessary to
ascend to 3,500 feet to get above the
cloud banks.

The explorers sighted no land
which had not been discovered pre-
viously.

There were no signs of animal life
on the ice.

Wilkins' trip of exploration over
the top of the world was made for
the sole purpose of trying to deter-
mine whether there was land where
Admiral Peary thought he saw it.
Wilkins purposely flew south of the
North Pole, instead of across it, to
carry out the scientific object of his
flight.

Captain Wilkins took his last ob-
servation about 200 miles from
Svalbard but visibility then became
bad.

Near Svalbard (the Spitzbergen
Archipelago) there was open sea.
Captain Wilkins knew he was near
land by two pointed mountain tops
he saw on Prince Karl's (Charles)
foreland, near Svalbard.

Then, with land in sight, a terri-
fic snowstorm started.

Wilkins and Eielson knew they
must land quickly. But landing
was made difficult by the gale.

With consummate skill, Eielson
managed to bring the plane to earth
on Doedmannsøra Island (Dead
Man's Island). The plane stopped
dead after a run of only 30 feet in
loose snow.

Wilkins and Eielson had flown
20½ hours at a speed of more than
110 miles an hour.

For steering, Captain Wilkins
found the ordinary magnetic com-
pass most serviceable. He used a
sun compass, too.

Wilkins had a special map of the
north pole region prepared by the
American Geographical Society, un-
der whose sponsorship the flight was
made.

The map was divided into 24 one-
hour parts; longitude was divided
into five-hour parts.

He had been able to obtain only
the crudest kind of map of Svalbard,
so his navigation must be consid-
ered marvelous, since he landed, in a
swirling snowstorm, only about 50
miles south of his destination—
Kangs Bay. There Wilkins expected
to meet General Umberto Nobile
polar exploration this year in the
dirigible Italia.

Wilkins hopes to tell General No-
bile about his experiences and the
route so Nobile can plan his trip
over some of the route which has
not yet been flown over.

Wilkins and Eielson were forced
to stay five days on Dead Man's Is-
land because of unusually bad weath-
er for this time of the year.

Snowstorm followed snowstorm,
with the direction of the wind con-
tinually changing, and the average
temperature 25 degrees below zero
Fahrenheit.

About 3 a. m. Saturday the weath-
er cleared and Wilkins and Eielson

The Ford Relief Plane Landed on Greenly Island

CORINTH, GREECE, IN RUINS FROM EARTHQUAKE

Athens, April 23.—(U.P.)—Reports
from the district that was dam-
aged by an earthquake over the
week-end today indicated that
Corinth was in ruins.

It was not believed the loss of
life would be heavy inasmuch as
many residents had fled the city
before the major earth distur-
bances took place.

Early advices today said that
11 were known to have been killed
at Corinth.

BEN NEWMARK MURDERED IN HIS OWN HOME

CHICAGOAN WAS FORMER CHIEF
INVESTIGATOR FOR ROBERT
E. CROWE

SLAYERS KILLED DETECTIVE
WITH CHARGE FROM A
SAWED-OFF SHOTGUN

Chicago, April 23.—(U.P.)—Ben
Newmark, former chief investigator
for State's Attorney Robert E.
Crowe, was murdered in his home
here by unknown assassins last night.
The slayers, firing through a bed-
room window, killed the detective
with one charge from a sawed-off
shotgun as he prepared to retire for
the night.

An underworld grudge, probably
incurred when he was the ace of
State's Attorney Crowe's investigat-
ing staff, was believed to have been
the motive for the murder. New-
mark had been active in politics. Re-
cently he had been a private detec-
tive.

He began to think of reaching civiliza-
tion.

Until then the only things the
pair could do were to eat and sleep
and remain huddled up in the mono-
plane. It gave them a good rest but
they had heavy work in front of
them before they could start their
airplane, which had been almost
covered with snow.

Moreover, the gasoline supply was
so low that fuel had to be pumped
into the higher tanks so the plane
could be made ready for starting.

Three times the engine was start-
ed at full speed, but the monoplane
refused to budge.

The third time Captain Wilkins
tried to help loosen the plane from
the snow.

He got out of the plane but held
tight to a rope tied to the seat in the
machine so he would be able to get
back.

Finally the plane started to move
but it was some time before Wilkins
was able to climb aboard.

When he was able to climb into
the plane, Wilkins shouted:
"On board again."

Before Captain Wilkins left the
machine to help start the snow-in-
plane, he and Lieutenant Eielson
had agreed that if Wilkins was un-
able to get back when the plane
started, Eielson should fly around
and try to find some people.

They would have been asked to go
to Dead Man's Island to rescue Wil-
kins.

Wilkins had left behind a tent
and provisions but had he, too, been
left behind he would have been ex-
posed to the cruelest hardships of
Arctic weather.

As the plane reached a height of
1,000 feet, the pair observed Bar-
entsburg and the masts of the Green
Harbor radio station, where they
landed at 1 A. M.

The noise of their motor brought
out everybody in Green Harbor.

Their arrival was a tremendous
surprise because nobody knew they
had left Alaska.

Everybody hoisted their flags; ev-
erybody ran with Herr Bowitz Ihlen,
the telegraph superintendent, to the
landing place. Wilkins and Eielson
were showered with congratulations
upon the success of their epochal
journey.

Wilkins and Eielson were fortun-
ate to land near the Green Harbor
radio station, because the radio at
King's Bay, where he was expected
to land, has been out of commission
since April 15, when the operator
died.

The first act of Wilkins and Ei-
elson after landing was to cover the
motor with a double tarpaulin to
prevent it from cooling too quickly.

World Tour of Captain and Mrs. W. H. Fawcett Recorded In Pictures, May Also Write a Book

5 MONTHS' TOUR TO AFRICA, ASIA, JAPAN, HAWAII, CANAL ZONE

THRILLING EXPERIENCES FALL
TO LOT OF FAWCETTS IN
EXPLORING OLD WORLD

HAPPY TO BE BACK AT BREEZY
POINT. RESORT IMPROVE-
MENTS UNDERWAY

When two keen, observant, ener-
getic people like Captain and Mrs.
W. H. Fawcett, the captain a trained
newspaper man and magazine pub-
lisher and his wife noted as the
charming hostess of Breezy Point
Lodge, set out to tour the world,
they come back with a wealth of ex-
periences gained in out of the way
places, and the thrills equivalent to
the greatest mystery story published
in Triple X or True Confessions.

Possessing the entire to the high-
est society, Captain and Mrs. Faw-
cett hobnobbed with Indian poten-
tates like the former Maharajah of
Indore and his American bride; had
tea at embassies; were accorded the
highest honors at Peking with the
Marines turning out and entertain-
ing at mess; met distinguished writ-
ers, speakers, princes, business and
professional men; penetrated the se-
crets of archaeological treasures,
tombs, castles; were shown the
glories and splendor of ancient ruins;
stood on Mt. Vesuvius and where
Mrs. Fawcett had one of the most
thrilling experiences, nearly slip-
ping into the awful crater depths;
and again when showering coins
among the diving boys at a swim-
ming pool built by one of the moguls
of India, being almost swept from
her feet into the deep pool.

The Captain, knowing he would
be called upon time and again at
the various conventions at Breezy
Point this year to tell of their world
trip, took movie pictures of their
trip and the same are now being
titled at Chicago.

So vivid are both in the recital of
their trip and experiences, that
friends, knowing the literary ability
of the Captain, have asked him to
write a book on his travels, embel-
lishing it with pictures he has tak-
en and collected. Others thought
they saw in his tour the germ for a
new magazine on foreign travel,
which would link the tourist, fash-
ion, sports and financial centers of
the tour in pleasant literary bonds.

A visit at the Fawcett home is a
revelation in wonderful treasures of
all kinds of art, rugs of Oriental
making, tapestries, cushions, curios,
books (many autographed by the
writers); vases, trays, canes, rarest
of robes including the complete ap-
parel of a millionaire mandarin;
Oriental shawls, Japanese and Chi-
nese jackets, tea gowns, etc.; handi-
work of the desert tribes of Algeria;
Hawaiian articles; West Indian toys;
cunning cigar cases which defy
opening until one knows where the
secret spring is located—in fact, the
Fawcett home is a treasure house to
visit.

Resort Improvements
Construction commenced this week
of a new \$75,000 addition to the
main lodge, which will be three
stories in height, of log and frame
construction, measuring 125 by 42
feet. It will contain 24 bedrooms,
each with a tiled bath; two large
porches, a large lounge and a con-
vention hall with a seating capacity
of 650.

Six cottages with two sets of hot
and cold shower baths are to be
built too and completed before the
June season of conventions starts.
The resort opens officially on Decora-
tion Day, May 30.

Two ARMED MEN
HOLD UP HOTEL
MANAGER, CLERK

St. Paul, April 23.—(U.P.)—Two armed
men held up the manager and clerk
of the Carleton, a loop hotel here to-
day, and escaped with \$170 in cash,
\$160 worth of checks and a ring
worth \$800.

REVIEW OF FLYING FEATS OF 1928

By United Press
A review of the outstanding avia-
tion achievements of 1928 establishes
the first four months of the present
year as the greatest flying period in
the world's history.

With the summer flying season just
beginning the following aerial accom-
plishments have been recorded:

An airplane, in which rode Captain
George Wilkins and Carl B. Eielson,
flew over the top of the world from
Point Barrow, Alaska, to Spitzbergen,
remaining in the air 20½ hours.

Baron Gunther von Huenefeld, Cap-
tain Hermann Koehl and Major James
Fitzmaurice made the first westward
crossing of the Atlantic by plane.

Major Debernardi of the Italian air
service established a new airplane
speed record at 318.53 miles an hour.

Eddie Stinson and George Halde-
man established a new sustained flight
record of almost 54 hours.

Bert Hinkler, British pilot, broke a
number of records in his solo flight
from London to Australia including
the time for that flight and the long-
est solo flight.

Dieudonne Costes and Joseph Le-
brix completed a remarkable air
cruise of the world, the only part of
which was not in an airplane was the
westward crossing of the Pacific.

Col. Charles A. Lindbergh completed
an extremely difficult goodwill tour
to Central America and Cuba.

The dirigible Los Angeles completed
one of its longest voyages in a cruise
to the Panama Canal Zone.

Note.—The foregoing United Press
dispatch will be followed tomorrow
by a forecast of the aviation achieve-
ments in prospect for the balance of
1928.

6 GREAT LAKES STATES ENTER CONTROVERSY

PROTEST AGAINST DIVERSION
CARRIED ON BY
ILLINOIS

CHICAGO DRAINAGE TAPPING
LAKE MICHIGAN AND
OTHER SOURCES

Washington, April 23.—(U.P.)—
Six Great Lakes states will present
to the U. S. supreme court today
their arguments against allowing a
seventh state, Illinois, to divert ap-
proximately six inches of water from
Lake Michigan and lesser amounts
from other lakes through the Chi-
cago drainage canal.

The arguments are in the form of
exceptions to the report of Special
Master Charles Evans Hughes, who
has recommended that the court dis-
miss three suits brought to enjoin
the diversion.

The complainants, Wisconsin, New
York, Michigan, Minnesota, Ohio and
Pennsylvania, have four hours to
present their cases. The argument
will start shortly after 1 P. M. and
will continue tomorrow. After the
complainants have concluded, the
defendants, the state of Illinois and
the Chicago drainage district, will
have 2½ hours to reply.

Five southern states, Missouri,
Kentucky, Tennessee, Mississippi
and Arkansas, have intervened in
the case in support of Chicago, and
probably will send a representative
to aid in the arguments. These
states argue that the diversion, rais-
ing the Mississippi level, improves
that river's navigation.

ARTHUR E. NELSON TO OUTLINE CAMPAIGN AT BRAINERD APRIL 24

St. Paul, April 23.—(U.P.)—Arthur E.
Nelson, former mayor of St. Paul and
Republican candidate for nomination
as U. S. senator, will make three key-
note speeches, it was announced at his
headquarters here today.

May 2, at Browns Valley, Nelson
will deliver his first address. The
following day he will appear as a
speaker at St. James, then, May 4, he
will address a meeting at Hibbing.

Nelson is at Elk River today, and
Tuesday will appear at the Rotary
meeting at Brainerd. Wednesday he
will be at Starbuck and Thursday at
a boy scout roundup at Winona.

FARMER-LABOR PARTY ENTERS NATIONAL RACE

WILL HAVE CANDIDATE IN THE
FIELD FOR THE PRES-
IDENCY

PARTY PLATFORM TO BE DRAFT-
ED AT CHICAGO CONVEN-
TION ON JULY 10

By JACK HIERTZ
St. Paul, April 23.—The Farmer-
Labor party will enter the national
race for president, it was definitely
ascertained here Sunday when Chi-
cago was selected as the national
convention city by a special com-
mittee appointed a month ago to canvass
sentiment on the proposition.

The date of the Chicago conven-
tion was set as July 10.

Candidates for president and vice
president will be selected and a party
platform drafted.

The meeting here Sunday was at-
tended by these representatives of the
third party in the northwest:
S. A. Stockwell and Joseph A. Pol-
ier, Minneapolis; Charles C. Shirley,
Chicago; Sigmund M. Slonin, Duluth;
William Lemke, Fargo, N. D., and
Eskell Rønn, Superior, Wis.

No organization having any affilia-
tion with national parties aside
from the Farmer-Labor group will
be allowed delegates, the committee
ruled. Only representatives from
farm cooperative organizations and
affiliated economic associations, rail-
road brotherhoods, local trade unions,
progressive political societies and
farmer labor party members will be
permitted to participate in the na-
tional meet.

That the Chicago convention will
bring to life a permanent third party
was the hope expressed by party
leaders. Poirier in a lengthy speech
said that the United States is the
only important nation in which the
producing class has failed to take an
active part in government through
the forming of political parties of
their own.

AIRPLANE RACE
THROUGH ANTARCTIC
TO THE SOUTH POLE

Los Angeles, April 23.—(U.P.)—Pos-
sibility of an airplane race through
the Antarctic to the South Pole was
broached here today.

Discussing the recent North Pole
flight of Capt. George Wilkins, Allan
Lockheed, head of the firm which
manufactured the explorer's plane,
said Wilkins next would attempt to
span the South Pole.

Lockheed said plans for this ad-
venture had advanced so far that it
was imperative for Capt. Wilkins to
return here within five weeks. Lock-
heed indicated the South Pole expedi-
tion would be made in the fall.

Commander Richard E. Byrd al-
ready has announced his intention of
taking a scientific expedition over the
South Pole next fall, promising a con-
test between Wilkins and Byrd for
first honors.

AMERICANS IN
SHANTUNG ASKED
TO LEAVE AREA

Washington, April 23.—(U.P.)—All
Americans in the northeastern section
of the Chinese province of Shantung
have been advised to evacuate at once
informed today by Minister MacMur-
to Chierfo, the state department was
ray in Peking.

On January 1 there were 114 Amer-
icans in the district, but many more
were believed to be there now.

AMERICAN LEGION
PRIZE AWARDED

Roseau, Minn., April 23.—(U.P.)—
The American Legion state depart-
ment prize for securing and main-
taining the four-year membership
average between two set dates, for
the ninth district, has been awarded
to Ernest Roadfelt, local post lead-
er.

The prize is a small shield with
a reproduction of the famous little
brown jug, and the inscription
"Roseau 1928."

RICH FARM LAND, NEWLY PAINTED, IS OVERRUN BY FLOOD

Batesville, Ark., April 23.—(U.P.)—
Thousands of acres of newly-
planted farm land was devastated
by flood waters of the White river
in north central Arkansas Satur-
day and Sunday, it was learned
here today.

Heavy rains that lasted over a
period of three days caused the
river to rise to the 33 foot mark
—10 feet more than flood stage.

The river was said to have
reached its crest Sunday and to-
day had started to recede.

DEMOCRATIC CANDIDATES OPEN CAMPAIGN

NATIONAL AND STATE NOMINEES
PICKED BY A COM-
MITTEE

BEGIN THEIR FIGHT FOR ELEC-
TION. INDREHUS NAMED FOR
U. S. SENATOR

St. Paul, April 23.—(U.P.)—Demo-
cratic candidates for national and
state offices, picked by the nominat-
ing committee of the state party at a
meeting in Minneapolis Saturday
today began their fight for the elec-
tion next fall.

Edward Indrehus of Foley headed
the ticket for U. S. senator, while
Andrew Nelson, Duluth, will bear
the standard as candidate for gover-
nor.

Other candidates named were:
Lieutenant-governor, Albert Pfa-
ender, New Ulm.

Attorney general, George Cahill,
St. Paul.

Secretary of state, Mrs. Ruth
Haynes Carpenter, Minneapolis.

State treasurer, William A. Just,
Rapidan.

Railroad and warehouse commis-
sioner, Wigo Justesen, Askov.

Indrehus, a farmer, lives 8 miles
from Foley, in Benton county. He
was the democratic candidate for
governor in 1922, running third in
the race in which J. A. O. Preis,
seeking re-election, defeated Magnus
Johnson by a narrow margin.

In 1924, Indrehus was the democratic
candidate for congress in his home
district, the sixth, but withdrew
shortly before the election.

Nelson, a former assistant state
superintendent of education, is an
attorney at Duluth. He formerly
lived at Austin, and has played a
prominent part in democratic poli-
tics of Minnesota for several years.
He presided as chairman at the last
democratic state convention.

Week End Murder, Suicide, Intemperance in Kansas City, Mo.

Kansas City, Mo., April 23.—UP—
A week-end of murder, suicide, and
intemperance was culminated in
Kansas City early today with a po-
lice raid on seven cabarets in which
198 frequenters and proprietors were
arrested.

The most startling epoch of the
period of violence was death of Pearl
Michael Rusk of Windsor, Mo., who
had driven to Kansas City with two
friends "to see the town."

Rusk was killed in a drunken
brawl outside a night club early on
Sunday morning. His life was liter-
ally "stamped out of him," his
companions said, in describing the
brutal fight yesterday.

As a direct result of the inhuman
treatment of Rusk, police raided all
of Kansas City's most notorious night
clubs at an early hour today. They
concluded their activities after nearly
200 persons were in jail or had
given bond to appear in court today
to answer liquor charges of vagrancy

6 MONTHS OLD
SON OF FARMER
BURNED TO DEATH

Ross, Minn., April 23.—(U.P.)—
The six months old son of Harold
Peterson was burned to death
when fire, caused by the child's
two-year-old sister playing with
matches, destroyed their home
near here. Mrs. Peterson was at
the barn attending to chores.
There was no fire in the home.

LOADED WITH SUPPLIES AND REPAIRS FOR BREMEN

MADE 460-MILE FLIGHT FROM
SEVEN ISLANDS,
QUE.

CARRIED TREMENDOUS LOAD;
HAD DIFFICULTY TAKING
OFF

By CARL D. GROAT
(United Press Staff Correspondent)

Montreal, Que., April 23.—The re-
lief plane sponsored by the North
American Newspaper Alliance and
the New York World, landed on
Greenly Island today after a 460-
mile flight from Seven Islands, Que.

A Canadian Marconi Company
message received here said the plane
landed at 11:40 A. M.

The plane, which left Detroit last
week, was loaded with supplies and
repairs for the monoplane Bremen,
stranded on Greenly Island after a
flight from Dublin, Ireland.

In the relief plane were Captain
James Fitzmaurice, the Irish mem-
ber to the Bremen's German-Irish
trans-Atlantic crew, Bernt Balchen,
pilot; Ernest Keoppen, mechanic,
and a representative of the flight's
sponsors.

The Marconi Company had word
from its Quebec operator first and
this was followed immediately by a
flash from its Clarke City operator,
announcing their safe landing.

Under plans made before depart-
ure of the plane, Keoppen will set
to work immediately to repair the
Bremen, whose pilots, Baron Von
Huenefeld, Captain Hermann Koehl
and Major Fitzmaurice landed on
Greenly Island more than a week
ago.

Seven Islands, Que., April 23.—
The Ford relief plane which flew
here yesterday from Murray Bay,
left this morning for Greenly Island
loaded with supplies and repairs for
the Bremen.

The Ford plane arrived at Seven
Islands yesterday afternoon. It had
made the 425-mile flight from Mur-
ray Bay in good time and stopped
there for refueling.

In it were Major James Fitzmaurice,
who flew across the Atlantic in
the Bremen with Baron Gunther Von
Huenefeld and Captain Hermann
Koehl, Bernt Balchen, Ernest Keop-
pen, a mechanic, and Charles Mur-
ray of the New York World.

The relief plane is tremendously
heavy. It is loaded down with spare
parts and benzol for the Bremen
and even when it left Murray Bay's
firm landing field yesterday, it had
difficulty in getting underway.

Only a few people were at the
Lake St. Agnes flying field when the
Ford plane with Balchen at the con-
trols, started down the runway.
Fraulien Junkers was among them
and she wished the quartet God
speed.

Keoppen said before he left that
he would need only a few hours in
which to repair the Bremen and
have it underway again.

Hartford, Conn., April 23.—Clar-
ence Chamberlin, one of the little
group of men to successfully span
the Atlantic by air, expected to leave
today in a Fairchild airplane for
Murray Bay, Que., where he will
greet the crew of the German trans-
Atlantic plane Bremen.

Last summer Chamberlin with
Charles Levine flew the airplane
Columbia from Mitchell Field, L. I.,
to Germany.

"This is the least I can do to
show my appreciation for the honors
accorded me when our flight ended
in Germany last year," Chamberlin
said.

Chamberlin is expected to greet
the Bremen crew at Murray Bay and
then act as an escort on the triumph-
al tour of the airplane to New
York. He will be accompanied by
Linton B. Wells, holder of the 28-
day world record, and Edward B.
Kelly.

CAPTAIN WILKINS DESCRIBES POLAR FLIGHT

START ON ICE RUNWAY WAS DANGEROUS FEAT

RUNWAY FIVE-EIGHTHS MILE
LONG AND ONLY 13 FEET
WIDE
MODERN AIR EXPLORERS PASS-
ED WITHIN 300 MILES
OF POLE

(Copyright, 1928, by United Press)

Green Harbor, Svalbard (Spitzbergen), April 23.—Captain George Hubert Wilkins started from Point Barrow, Alaska, April 15, at 10 o'clock Alaska time (presumably 10 A. M.)

He was obliged to change his starting point because the runway was too short for the heavily loaded monoplane which weighs about 1,800 pounds when empty and 3,600 pounds when loaded.

The weight of the plane necessitated a runway of about five-eighths of a mile to achieve a speed of 80 kilometers (50 miles) an hour, so that the plane could rise.

The newly selected starting point was bad because of loose snow which had to be hardened.

That was done only to a width of four meters (about 13 feet) so Lieut. Carl B. Eielson, pilot of the Arctic plane, was obliged to steer carefully. The ice was very uneven, adding to the danger of the start.

Captain Wilkins passed the places where Dr. Cook and Admiral Peary presumably had been and sighted Grant Land.

The modern air explorers passed about 300 miles from the North Pole. The weather was fine then, although a little foggy. The plane flew at a height of 1,000 feet and was obliged to rise a few times.

Occasionally it was necessary to ascend to 3,500 feet to get above the cloud banks.

The explorers sighted no land which had not been discovered previously.

There were no signs of animal life on the ice.

Wilkins' trip of exploration over the top of the world was made for the sole purpose of trying to determine whether there was land where Admiral Peary thought he saw it. Wilkins purposely flew south of the North Pole, instead of across it, to carry out the scientific object of his flight.

Captain Wilkins took his last observation about 200 miles from Svalbard but visibility then became bad.

Near Svalbard (the Spitzbergen Archipelago) there was open sea.

Captain Wilkins knew he was near land by two pointed mountain tops he saw on Prince Karl's (Charles) foreland, near Svalbard.

Then, with land in sight, a terrific snowstorm started.

Wilkins and Eielson knew they must land quickly. But landing was made difficult by the gale.

With consummate skill, Eielson managed to bring the plane to earth on Doedmansoira Island (Dead Man's Island). The plane stopped dead after a run of only 30 feet in loose snow.

Wilkins and Eielson had flown 20½ hours at a speed of more than 110 miles an hour.

For steering, Captain Wilkins found the ordinary magnetic compass most serviceable. He used a sun compass, too.

Wilkins had a special map of the north pole region prepared by the American Geographical Society, under whose sponsorship the flight was made.

The map was divided into 24 one-hour parts; longitude was divided into five-hour parts.

He had been able to obtain only the crudest kind of map of Svalbard, so his navigation must be considered marvelous, since he landed, in a swirling snowstorm, only about 50 miles south of his destination—Kangs Bay. There Wilkins expected to meet General Umberto Nobile polar exploration this year in the dirigible Italia.

Wilkins hopes to tell General Nobile about his experiences and the route so Nobile can plan his trip over some of the route which has not yet been flown over.

Wilkins and Eielson were forced to stay five days on Dead Man's Island because of unusually bad weather for this time of the year.

Snowstorm followed snowstorm, with the direction of the wind continually changing, and the average temperature 25 degrees below zero Fahrenheit.

About 3 a. m. Saturday the weather cleared and Wilkins and Eielson

The Ford Relief Plane Landed on Greenly Island

CORINTH, GREECE, IN RUINS FROM EARTHQUAKE

Athens, April 23.—(U.P.)—Reports from the district that was damaged by an earthquake over the week-end today indicated that Corinth was in ruins.

It was not believed the loss of life would be heavy inasmuch as many residents had fled the city before the major earth disturbances took place.

Early advices today said that 11 were known to have been killed at Corinth.

BEN NEWMARK MURDERED IN HIS OWN HOME

CHICAGOAN WAS FORMER CHIEF
INVESTIGATOR FOR ROBERT
E. CROWE

SLAYERS KILLED DETECTIVE
WITH CHARGE FROM A
SAWED-OFF SHOTGUN

Chicago, April 23.—(U.P.)—Ben Newmark, former chief investigator for State's Attorney Robert E. Crowe, was murdered in his home here by unknown assassins last night.

The slayers, firing through a bedroom window, killed the detective with one charge from a sawed-off shotgun as he prepared to retire for the night.

An underworld grudge, probably incurred when he was the ace of State's Attorney Crowe's investigating staff, was believed to have been the motive for the murder. Newmark had been active in politics. Recently he had been a private detective.

He began to think of reaching civilization.

Until then the only things the pair could do were to eat and sleep and remain huddled up in the monoplane. It gave them a good rest but they had heavy work in front of them before they could start their airplane, which had been almost covered with snow.

Moreover, the gasoline supply was so low that fuel had to be pumped into the higher tanks so the plane could be made ready for starting.

Three times the engine was started at full speed, but the monoplane refused to budge.

The third time Captain Wilkins tried to help loosen the plane from the snow.

He got out of the plane but held tight to a rope tied to the seat in the machine so he would be able to get back.

Finally the plane started to move but it was some time before Wilkins was able to climb aboard.

When he was able to climb into the plane, Wilkins shouted:

"On board again."

Before Captain Wilkins left the machine to help start the snow-in plane, he and Lieutenant Eielson had agreed that if Wilkins was unable to get back when the plane started, Eielson should fly around and try to find some people.

They would have been asked to go to Dead Man's Island to rescue Wilkins.

Wilkins had left behind a tent and provisions but had he, too, been left behind he would have been exposed to the cruellest hardships of Arctic weather.

As the plane reached a height of 1,000 feet, the pair observed Barentsburg and the masts of the Green Harbor radio station, where they landed at 1 A. M.

The noise of their motor brought out everybody in Green Harbor.

Their arrival was a tremendous surprise because nobody knew they had left Alaska.

Everybody hoisted their flags; everybody ran with Herr Bowitz Ihlen, the telegraph superintendent, to the landing place. Wilkins and Eielson were showered with congratulations upon the success of their epochal journey.

Wilkins and Eielson were fortunate to land near the Green Harbor radio station, because the radio at King's Bay, where he was expected to land, has been out of commission since April 15, when the operator died.

The first act of Wilkins and Eielson after landing was to cover the motor with a double tarpaulin to prevent it from cooling too quickly.

World Tour of Captain and Mrs. W. H. Fawcett Recorded In Pictures, May Also Write a Book

5 MONTHS' TOUR TO AFRICA, ASIA, JAPAN, HAWAII, CANAL ZONE

THRILLING EXPERIENCES FALL
TO LOT OF FAWCETTS IN
EXPLORING OLD WORLD

HAPPY TO BE BACK AT BREEZY
POINT. RESORT IMPROVE-
MENTS UNDERWAY

When two keen, observant, energetic people like Captain and Mrs. W. H. Fawcett, the captain a trained newspaper man and magazine publisher and his wife noted as the charming hostess of Breezy Point Lodge, set out to tour the world, they come back with a wealth of experiences gained in out of the way places, and the thrills equivalent to the greatest mystery story published in Triple X or True Confessions.

Possessing the entire to the highest society, Captain and Mrs. Fawcett hobnobbed with Indian potentates like the former Maharajah of Indore and his American bride; had tea at embassies; were accorded the highest honors at Peking with the Marines turning out and entertaining at mess; met distinguished writers, speakers, princes, business and professional men; penetrated the secrets of archaeological treasures, tombs, castles; were shown the glories and splendor of ancient ruins; stood on Mt. Vesuvius and where Mrs. Fawcett had one of the most thrilling experiences, nearly slipping into the awful crater depths; and again when showering coins among the diving boys at a swimming pool built by one of the moguls of India, being almost swept from her feet into the deep pool.

The Captain, knowing he would be called upon time and again at the various conventions at Breezy Point this year to tell of their world tour, took movie pictures of their trip and the same are now being titled at Chicago.

So vivid are both in the recital of their trip and experiences, that friends, knowing the literary ability of the Captain, have asked him to write a book on his travels, embellishing it with pictures he has taken and collected. Others thought they saw in his tour the germ for a new magazine on foreign travel, which would link the tourist, fashion, sports and financial centers of the tour in pleasant literary bonds.

A visit at the Fawcett home is a revelation in wonderful treasures of all kinds of art, rugs of Oriental making, tapestries, cushions, curios, books (many autographed by writers); vases, trays, canes, rarest of robes including the complete apparel of a millionaire mandarin; Oriental shawls, Japanese and Chinese jackets, tea gowns, etc.; handiwork of the desert tribes of Algeria; Hawaiian articles; West Indian toys; cunning cigarette cases which defy opening until one knows where the secret spring is located—in fact, the Fawcett home is a treasure house to visit.

Resort Improvements
Construction commenced this week of a new \$75,000 addition to the main lodge, which will be three stories in height, of log and frame construction, measuring 125 by 42 feet. It will contain 24 bedrooms, each with a tiled bath; two large porches, a large lounge and a convention hall with a seating capacity of 650.

Six cottages with two sets of hot and cold shower baths are to be built too and completed before the June season of conventions starts. The resort opens officially on Decoration Day, May 30.

TWO ARMED MEN
HOLD UP HOTEL
MANAGER, CLERK

St. Paul, April 23.—(U.P.)—Two armed men held up the manager and clerk of the Carleton, a loop hotel here today, and escaped with \$170 in cash.

A \$100 worth of checks and a ring worth \$800.

REVIEW OF FLYING FEATS OF 1928

By United Press

A review of the outstanding aviation achievements of 1928 establishes the first four months of the present year as the greatest flying period in the world's history.

With the summer flying season just beginning the following aerial accomplishments have been recorded:

An airplane, in which rode Captain George Wilkins and Carl B. Eielson, flew over the top of the world from Point Barrow, Alaska, to Spitzbergen, remaining in the air 20½ hours.

Baron Gunther von Huenefeld, Captain Hermann Koehl and Major James Fitzmaurice made the first westward crossing of the Atlantic by plane.

Major Debernard of the Italian air service established a new airplane speed record at 318.53 miles an hour. Eddie Stinson and George Halderman established a new sustained flight record of almost 54 hours.

Bert Hinkler, British pilot, broke a number of records in his solo flight from London to Australia including the time for that flight and the longest solo flight.

Dieudonne Costes and Joseph Lebrun completed a remarkable air cruise of the world, the only part of which was not in an airplane was the westward crossing of the Pacific.

Col. Charles A. Lindbergh completed an extremely difficult goodwill tour to Central America and Cuba.

The dirigible Los Angeles completed one of its longest voyages in a cruise to the Panama Canal Zone.

Note—The foregoing United Press dispatch will be followed tomorrow by a forecast of the aviation achievements in prospect for the balance of 1928.

6 GREAT LAKES STATES ENTER CONTROVERSY

PROTEST AGAINST DIVERSION
CARRIED ON BY
ILLINOIS

CHICAGO DRAINAGE TAPPING
LAKE MICHIGAN AND
OTHER SOURCES

Washington, April 23.—(U.P.)—Six Great Lakes states will present to the U. S. supreme court today their arguments against allowing a seventh state, Illinois, to divert approximately six inches of water from Lake Michigan and lesser amounts from other lakes through the Chicago drainage canal.

The arguments are in the form of exceptions to the report of Special Master Charles Evans Hughes, who has recommended that the court dismiss three suits brought to enjoin the diversion.

The complainants, Wisconsin, New York, Michigan, Minnesota, Ohio and Pennsylvania, have four hours to present their cases. The argument will start shortly after 1 P. M. and will continue tomorrow. After the complainants have concluded, the defendants, the state of Illinois and the Chicago drainage district, will have 2½ hours to reply.

Five southern states, Missouri, Kentucky, Tennessee, Mississippi and Arkansas, have intervened in the case in support of Chicago, and probably will send a representative to aid in the arguments. These states argue that the diversion, raising the Mississippi level, improves that river's navigation.

ARTHUR E. NELSON TO OUTLINE CAMPAIGN AT BRAINERD APRIL 24

St. Paul, April 23.—(U.P.)—Arthur E. Nelson, former mayor of St. Paul and republican candidate for nomination as U. S. senator, will make three keynote speeches, it was announced at his headquarters here today.

May 2, at Browns Valley, Nelson will deliver his first address. The following day he will appear as a speaker at St. James, then, May 4, he will address a meeting at Hibbing.

Nelson is at Elk River today, and Tuesday will appear at the Rotary meeting at Brainerd. Wednesday he will be at Starbuck and Thursday at a boy scout roundup at Winona.

FARMER-LABOR PARTY ENTERS NATIONAL RACE

WILL HAVE CANDIDATE IN THE
FIELD FOR THE PRES-
IDENCY

PARTY PLATFORM TO BE DRAFT-
ED AT CHICAGO CONVEN-
TION ON JULY 10
By JACK HIERTZ

St. Paul, April 23.—The Farmer-Labor party will enter the national race for president, it was definitely ascertained here Sunday when Chicago was selected as the national convention city by a special committee appointed a month ago to canvass sentiment on the proposition.

The date of the Chicago convention was set as July 10.

Candidates for president and vice president will be selected and a party platform drafted.

The meeting here Sunday was attended by these representatives of the third party in the northwest: S. A. Stockwell and Joseph A. Poirier, Minneapolis; Charles C. Shirley, Chicago; Sigmund M. Slonin, Duluth; William Lemke, Fargo, N. D.; and Eskell Rinn, Superior, Wis.

No organization having any affiliation with national parties aside from the Farmer-Labor group will be allowed delegates, the committee ruled.

Only representatives from farm cooperative organizations and affiliated economic associations, railroad brotherhoods, local trade unions, progressive political societies and farmer labor party members will be permitted to participate in the national meet.

That the Chicago convention will bring to life a permanent third party was the hope expressed by party leaders. Poirier in a lengthy speech said that the United States is the only important nation in which the producing class has failed to take an active part in government through the forming of political parties of their own.

AIRPLANE RACE THROUGH ANTARCTIC TO THE SOUTH POLE

Los Angeles, April 23.—(U.P.)—Possibility of an airplane race through the Antarctic to the South Pole was broached here today.

Discussing the recent North Pole flight of Capt. George Wilkins, Allan Lockheed, head of the firm which manufactured the explorer's plane, said Wilkins next would attempt to span the South Pole.

Lockheed said plans for this adventure had advanced so far that it was imperative for Capt. Wilkins to return here within five weeks. Lockheed indicated the South Pole expedition would be made in the fall.

Commander Richard E. Byrd already has announced his intention of taking a scientific expedition over the South Pole next fall, promising a contest between Wilkins and Byrd for first honors.

AMERICANS IN SHANTUNG ASKED TO LEAVE AREA

Washington, April 23.—(U.P.)—All Americans in the northeastern section of the Chinese province of Shantung have been advised to evacuate at once informed today by Minister MacMurray to Churfou, the state department was ray in Peking.

On January 1 there were 114 Americans in the district, but many more were believed to be there now.

AMERICAN LEGION PRIZE AWARDED

Roseau, Minn., April 23.—(U.P.)—The American Legion state department prize for securing and maintaining the four-year membership average between two set dates, for the ninth district, has been awarded to Ernest Roadfolt, local post leader.

The prize is a small shield with a reproduction of the famous little brown jug, and the inscription "Roseau 1928."

RICH FARM LAND, NEWLY PAINTED, IS OVERRUN BY FLOOD

Batesville, Ark., April 23.—(U.P.)—Thousands of acres of newly-planted farm land was devastated by flood waters of the White river in north central Arkansas Saturday and Sunday, it was learned here today.

Heavy rains that lasted over a period of three days caused the river to rise to the 33 foot mark—10 feet more than flood stage.

The river was said to have reached its crest Sunday and today had started to recede.

DEMOCRATIC CANDIDATES OPEN CAMPAIGN

NATIONAL AND STATE NOMINEES
PICKED BY A COM-
MITTEE

BEGIN THEIR FIGHT FOR ELEC-
TION. INDEHUS NAMED FOR
U. S. SENATOR

St. Paul, April 23.—(U.P.)—Democratic candidates for national and state offices, picked by the nominating committee of the state party at a meeting in Minneapolis Saturday today began their fight for the election next fall.

Edward Indrehus of Foley headed the ticket for U. S. senator, while Andrew Nelson, Duluth, will bear the standard as candidate for governor.

Other candidates named were: Lieutenant-governor, Albert Pfander, New Ulm.

Attorney general, George Cahill, St. Paul.

Secretary of state, Mrs. Ruth Haynes Carpenter, Minneapolis.

State treasurer, William A. Just, Rapidan.

Railroad and warehouse commissioner, Wigo Justesen, Askov.

Indrehus, a farmer, lives 8 miles from Foley, in Benton county. He was the democratic candidate for governor in 1922, running third in the race in which J. A. O. Preus, seeking re-election, defeated Magnus Johnson by a narrow margin. In 1924, Indrehus was the democratic candidate for congress in his home district, the sixth, but withdrew shortly before the election.

Nelson, a former assistant state superintendent of education, is an attorney at Duluth. He formerly lived at Austin, and has played a prominent part in democratic politics of Minnesota for several years. He presided as chairman at the last democratic state convention.

Week End Murder, Suicide, Intemperance in Kansas City, Mo.

Kansas City, Mo., April 23.—UP—A week-end of murder, suicide, and intemperance was culminated in Kansas City early today with a police raid on seven cabarets in which 198 frequenters and proprietors were arrested.

The most startling epoch of the period of violence was death of Pearl Michael Rusk of Windsor, Mo., who had driven to Kansas City with two friends "to see the town."

Rusk was killed in a drunken brawl outside a night club early on Sunday morning. His life was literally "stamped out of him," his companions said, in describing the brutal fight yesterday.

As a direct result of the inhuman treatment of Rusk, police raided all of Kansas City's most notorious night clubs at an early hour today. They concluded their activities after nearly 200 persons were in jail or had given bond to appear in court today to answer liquor charges of vagrancy.

6 MONTHS OLD SON OF FARMER BURNED TO DEATH

Ross, Minn., April 23.—(U.P.)—The six months old son of Harold Peterson was burned to death when fire, caused by the child's two-year-old sister playing with matches, destroyed their home near here. Mrs. Peterson was at the barn attending to chores. There was no fire in the home.

LOADED WITH SUPPLIES AND REPAIRS FOR BREMEN

MADE 460-MILE FLIGHT FROM
SEVEN ISLANDS,
QUE.

CARRIED TREMENDOUS LOAD;
HAD DIFFICULTY TAKING
OFF

By CARL D. GROAT
(United Press Staff Correspondent)

Montreal, Que., April 23.—The relief plane sponsored by the North American Newspaper Alliance and the New York World, landed on Greenly Island today after a 460-mile flight from Seven Islands, Que.

A Canadian Marconi Company message received here said the plane landed at 11:40 A. M.

The plane, which left Detroit last week, was loaded with supplies and repairs for the monoplane Bremen, stranded on Greenly Island after a flight from Dublin, Ireland.

In the relief plane were Captain James Fitzmaurice, the Irish member for the Bremen's German-Irish trans-Atlantic crew, Bernt Balchen, pilot; Ernest Kooppen, mechanic, and a representative of the flight's sponsors.

The Marconi Company had word from its Quebec operator first and this was followed immediately by a flash from its Clarke City operator, announcing their safe landing.

Under plans made before departure of the plane, Kooppen will set to work immediately to repair the Bremen, whose pilots, Baron Von Huenefeld, Captain Hermann Koehl and Major Fitzmaurice landed on Greenly Island more than a week ago.

Seven Islands, Que., April 23.—The Ford relief plane which flew here yesterday from Murray Bay, left this morning for Greenly Island loaded with supplies and repairs for the Bremen.

The Ford plane arrived at Seven Islands yesterday afternoon. It had made the 425-mile flight from Murray Bay in good time and stopped there for refueling.

It was Major James Fitzmaurice, who flew across the Atlantic in the Bremen with Baron Gunther von Huenefeld and Captain Hermann Koehl, Bernt Balchen, Ernest Kooppen, a mechanic, and Charles Murray of the New York World.

The relief plane is tremendously heavy. It is loaded down with spare parts and benzol for the Bremen and even when it left Murray Bay's firm landing field yesterday, it had difficulty in getting underway.

Only a few people were at the Lake St. Agnes flying field when the Ford plane with Balchen at the controls, started down the runway. Fraulein Junkers was among them and she wished the quartet God speed.

Kooppen said before he left that he would need only a few hours in which to repair the Bremen and have it underway again.

Hartford, Conn., April 23.—Clarence Chamberlin, one of the little group of men to successfully span the Atlantic by air, expected to leave today in a Fairchild airplane for Murray Bay, Que., where he will greet the crew of the German trans-Atlantic plane Bremen.

Last summer Chamberlin with Charles Levine flew the airplane Columbia from Mitchell Field, L. I., to Germany.

"This is the least I can do to show my appreciation for the honors accorded me when our flight ended in Germany last year," Chamberlin said.

Chamberlin is expected to greet the Bremen crew at Murray Bay and then act as an escort on the triumphal tour of the airplane to New York. He will be accompanied by Linton B. Wells, holder of the 28-day world record, and Edward B. Kelly.

ADDITIONAL EARTH SHOCKS IN AUSTRIA

Vienna, April 23.—(U.P.)—Additional earth shocks were felt in the Golemkonara district Sunday, reports said today.

Several houses collapsed and there was considerable new damage.

PERSONAL, CLUB and LOCAL NEWS

Vernon E. White
Contractor and Builder

Bishop Granville Gaylor Bennett.

D. D. of the Protestant Episcopal Diocese of Duluth will make his annual visitation to St. Paul's Episcopal church of Brainerd tomorrow night, Tuesday, April 24th and a special service will be conducted consisting of administering the apostolic rite and sacrament of holy communion to the usual class that is presented each year upon the occasion of the official visitation of the Bishop and preaching the sermon of the evening. Bishop Bennett, as a rule, has made his annual visitation to St. Paul's parish Brainerd

during the month of May but he has been compelled to advance his date for the visit this year as following a conference last year the President Bishop of the Protestant Episcopal church in the United States has appointed Bishop Bennett as the Acting Bishop of Wyoming for the year 1928 which gives Bishop Bennett the added duty of visiting the seventy-five parishes and missions in the state of Wyoming during this year. The public is cordially invited to this special service at St. Paul's Episcopal church, Seventh and Juniper streets, Tuesday evening at 7:30 p. m.

CAPTAIN WILKINS DESCRIBES POLAR FLIGHT

(Continued from Page 1)

because the temperature was 27 degrees below zero.

They landed about 170 feet west of the Svalbard (Green Harbor) radio station, descending from a height of 220 feet.

The provisions they carried consisted of pemmican biscuit, malted milk and chocolate sufficient for six months.

Capt. Wilkins and Lieut. Eielson, their feat accomplished, greatly appreciated the change in diet afforded by their first breakfast in Green Harbor.

Oslo, Norway, April 23.—(UP)—The Arctic explorers Capt. George Hubert Wilkins and his pilot, Lieut. Carl B. Eielson, probably will fly to Norway from Green Harbor, Spitzbergen, because no steamer can reach them before the end of May. It was reported here today that the Wilkins plane which flew across the top of the world was repaired by the explorers. It had been slightly damaged in landing.

Peacock's Fur

A well-known man about town claims to have found what he considers the finest example of the beautiful-but dumb of the species. It fell to his lot one afternoon recently to escort a very beautiful seventeen-year-old girl about Belle Isle. Grabbing at his sleeve she asked: "Oh, what is that?" and when he looked around, he replied that it was a peacock. "My, what gorgeous fur it has," she replied.—Detroit News.

FORMER ALIEN PROPERTY CUSTODIAN ON WAY TO PRISON

New York, April 23.—(UP)—Col. Thomas W. Miller, former alien property custodian surrendered to federal authorities here today to be taken to the federal penitentiary at Atlanta. Miller is under sentence of 18 months for conspiring to deprive the United States of his best counsel and services in the deal by which \$7,000,000 in assets of the American Metal corporation, seized as alien property, was returned to foreign interests.

Coal Fortification

There is no coal being formed under the surface now and never was. The coal that is now found under the earth's surface, no matter how deep it may be, was formed above the surface and later covered up. Coal was formed in ancient peat bogs in the same manner as peat is being formed at the present time.

NOTICE

No Money Down as we advertise in National Magazines. The 21-jewel Studebaker Watch, \$5.00 per month. Salesman from factory in town tonight. Come up and see for yourself and bring no money, as you don't need to. Also diamonds, wrist watches. Room 10, Central Hotel, 4 to 10 p. m.

A rolling ocean of heads come in to see---

All sizes—all kinds—looking for ONE thing in Hats.

They find it at the John M. Bye Clothing Co. for we reason this way—

If a man doesn't change hats for the sake of STYLE—then for mercy sakes why does he change at all.

Schoble hats have the flare and the fling that allow you to charge the \$5 overhead up pleasantly without regret.

COL. LINDBERGH CONFERS WITH SECRETARY OLDS

Washington, April 23.—(UP)—Col. Charles A. Lindbergh conferred for a half hour today with Undersecretary of State R. E. Olds.

It was understood they discussed plans for Lindbergh's proposed good will flight to European and Asiatic countries this summer.

Explaining Crimson Snow

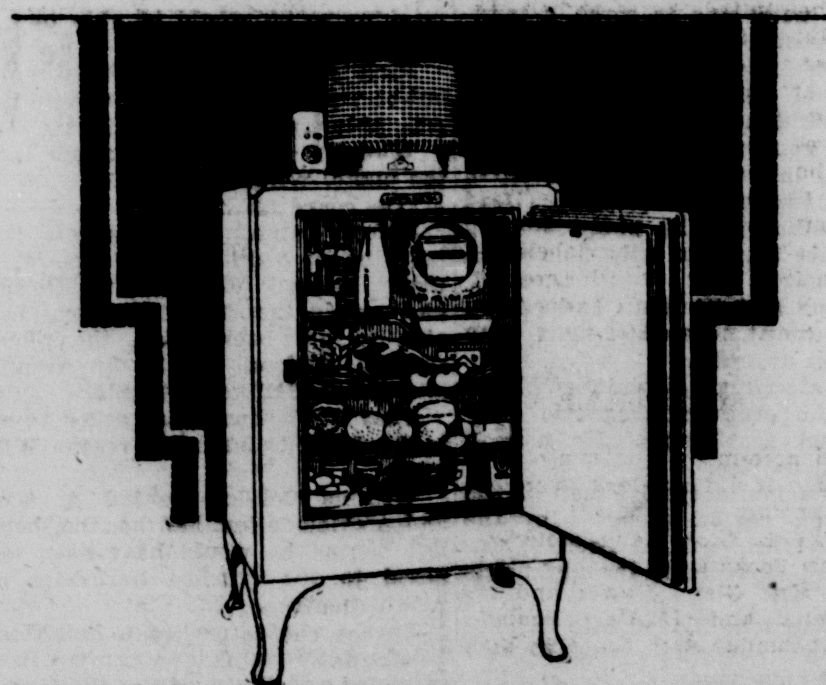

The supposed phenomenon of red snow, seen many times at about 6,000 feet above sea level on Mount Albert Edward, British Columbia, has been explained scientifically as being due to the presence of a minute plant known to botanists as *Protococcus nivalis*. The illusion becomes more pronounced the deeper one digs into the snow, which is tinted a deep crimson.

Bishop Granville Gaylor Bennett.

D. D., of the Protestant Episcopal

Diocese of Duluth will make his annual visitation to St. Paul's Episcopal church of Brainerd tomorrow

night, Tuesday, April 24th and a special service will be conducted

consisting of administering the apostolic rite and sacrament of holy

confirmation to the usual class that is presented each year upon the occasion of the official visitation of the

Bishop and preaching the sermon of the evening. Bishop Bennett, as a rule, has made his annual visitation to St. Paul's parish Brainerd

during the month of May but he has been compelled to advance his date for the visit this year as following a conference last year the President

Bishop of the Protestant Episcopal church in the United States has appointed Bishop Bennett as the Acting Bishop of Wyoming for the year

1928 which gives Bishop Bennett the added duty of visiting the seventy-five parishes and missions in the state of Wyoming during this year.

The public is cordially invited to this special service at St. Paul's Episcopal church, Seventh and Juniper streets, Tuesday evening at 7:30 p. m.

CAPTAIN WILKINS DESCRIBES POLAR FLIGHT

(Continued from Page 1)

because the temperature was 27 degrees below zero.

They landed about 170 feet west of the Svalbard (Green Harbor) radio station, descending from a height of 250 feet.

The provisions they carried consisted of pemmican biscuit, malted milk and chocolate sufficient for six months.

Capt. Wilkins and Lieut. Eielson, their feat accomplished, greatly appreciated the change in diet afforded by their first breakfast in Green Harbor.

Oslo, Norway, April 23.—(UP)—The Arctic explorers Capt. George Hubert Wilkins and his pilot, Lieut. Carl B. Eielson, probably will fly to Norway from Green Harbor, Spitzbergen, because no steamer can reach them before the end of May.

It was reported here today that the Wilkins plane which flew across the top of the world was repaired by the explorers. It had been slightly damaged in landing.

Peacock's Fur

A well-known man about town claims to have found what he considers the finest example of the beautiful-but dumb of the species. It fell to his lot one afternoon recently to escort a very beautiful seventeen-year-old girl about Belle Isle. Grabbing at his sleeve she asked: "Oh, what is that?" and when he looked around, he replied that it was a peacock. "My, what gorgeous fur it has," she replied.—Detroit News.

Coal Formation

There is no coal being formed under the surface now and never was.

The coal that is now found under the earth's surface, no matter how deep it may be, was formed above the surface and later covered up. Coal was formed in ancient peat bogs in the same manner as peat is being formed at the present time.

Explaining Crimson Snow

The supposed phenomenon of red snow, seen many times at about 6,000 feet above sea level on Mount Albert Edward, British Columbia, has been explained scientifically as being due to the presence of a minute plant known to botanists as Protococcus nivalis. The illusion becomes more pronounced the deeper one digs into the snow, which is tinted a deep crimson.

LOCAL SOPRANO IN SCHUMANN CHORUS

Miss Bernice Samuelson to Appear
in Concert at Clara Lutheran
Church

EVENING OF MAY 7

Gustavus Adolphus College Chorus
Well Known Throughout
Northwest

When the noted Schumann Chorus of Gustavus Adolphus College, St. Peter, Minn., makes its appearance here at the Clara Lutheran church Monday, May 7, the Brainerd public will greet one of its own, in the person of Miss Bernice Samuelson, soprano, member of the chorus.

Miss Samuelson, student at the college, is a daughter of Rev. and Mrs. August Samuelson, of the Clara Lutheran church parsonage.

The chorus will present the concert under the direction of Professor A. O. Peterson with Arthur Pearson, violinist, and Eleanor Ostlund, pianist.

Scouting stands for honor, character, service, unselfishness, love of God, pure patriotism, for the fusion of all community forces, of whatever race or creed in behalf of youth. The Boy Scout movement has come into being as a heaven, as a breath of life to sweeten and strengthen and enoble life by teaching the youth with a flaming idealism and yet with a very practical program.

Success in a Scout Council or Area is simply a matter of organization and cultivation. This is a thing for men of the community to handle. The Scout Executive is not engaged to constitute the Council of an Area nor to act even as a committee of that council. True, he can suggest and offer ideas; but his duties are to see that the Council's desires and needs as to leadership and scout training are supervised and interpreted to boys in a manner most effective with boys. It is up to citizens to provide organization and to maintain it. That requires personal attention and effort. It is a real service these men perform to their community.

Scouting teaches "learning by doing" rather than arguing why it does.

An important function of a local council is to induce more boys to go into scouting. Parents should insist that their sons join a troop.

Scouts prefer other scouts as their companions. This has been proven over and over again. That being true, we can appreciate the value of scouting. It gives your boy the right kind of companionship. It proves the moral value of scouting.

Did you know that the Boy Scouts of America is a corporation operating under a charter granted by our federal government. The president of the United States signed the bill on June 15, 1916, as passed by Congress, and it is a law of the land. The act also protects the use of the name and the various insignia, badges and medals conferred upon the boys. Over 300 business houses that had endeavored to use the word "Scout" as a name of their products had to withdraw their labels and refrain from using it. Congress would hardly go that far if there were not real merit to scouting.

JAIL LAKE

On account of the snow that fell Sunday it did not look very much like spring.

Mrs. L. Glover and children, also Harry Socks spent Sunday with Mr. and Mrs. Glenn Glover and family. Rella and Luella Laubenstein spent Sunday with the Ady Johns in girls.

Clough Lake school did not have a very large school this week, here are the pupils that were absent: Glorine, Evelyn, Eugene and Larry Glover, Rella and Luella Laubenstein, also Jack Hundley.

Harold Laubenstein spent Saturday with the Glenn Glover children.

Mrs. Martha Glover and son were Pine River shoppers Friday.

Leon Glover of Pine River purchased a new McCormick and Deering manure spreader from Bill Gilbert Tuesday.

Fred Sweet and friend Raymond Clark took dinner with Fred's parents Monday.

Carl Laubenstein was a Pine River visitor Friday.

STANLEY VANEK TO ESTABLISH HERE

Sale of E. S. Houghton Jewelry Store
to Former Resident Announced
Today

TO OPEN TOMORROW

Mr. Houghton and Family to Move
Soon to Fruit Ranch at Riverside,
Calif.

Edwin S. Houghton, jeweler and optician in Brainerd for the past 28 years, announced today the sale of his establishment at 211 South 6th Street, to Stanley Vanek, of Seattle, Wash., formerly jeweler and engraver in Brainerd.

Mr. Vanek will occupy his new jewelry store location tomorrow morning. Like Mr. Houghton, he has had many years of experience in his profession.

Mr. Houghton stated today that he and his family planned to move to their fruit ranch at Riverside, Calif., as soon as arrangements can be made for the sale of their lake property and home.

BRAINERD 25 YEARS AGO

From the Daily Dispatch

April 23, 1903

Superintendent Blanchard, of the Minnesota division, came in from the south this afternoon accompanied by Superintendent of Bridges Yager. Mrs. Yager also came up from Minneapolis and will visit for a short time with her parents, Mr. and Mrs. R. K. Whiteley.

Mrs. W. P. Jewett arrived in the city this afternoon from St. Paul and will be the guest of Mrs. W. H. Gemmell.

Chairman Adair of the entertainment committee of the Brainerd lodge E. P. O. E. has announced committees for the party to be given on Friday evening for the members of the order and their ladies in the Elk's hall. They are as follows: reception, Dr. and Mrs. Werner Hemstead, A. J. Halsted, Miss Flo Halsted, H. D. Treglawny, Miss Bessie Treglawny, Mr. and Mrs. W. A. Fleming, and Mr. and Mrs. F. A. Farrar. Floor, Dr. B. B. Walker, Watkins and Thabes. Reception, F. S. Parker, H. P. Dunn and Dr. Frederick. Music, A. L. Webb, S. F. Alderman and E. O. Webb. There will be cards and dancing and refreshments will be served.

Kenny McDonalds, who has held a position in the state senate this winter, returned home this morning the legislature having adjourned.

Joseph Murphy left this afternoon for St. Paul where he expects to go to work in a short time. He has resigned his position at the N. P. shops.

RIDE HORSEBACK TO ATTEND BOY SCOUT MEETINGS

Transportation methods during the pioneer days of Minnesota are being

re-enacted by a group of boy scouts from the neighborhood of Central as they ride horseback, drive a buckboard or walk miles each week to attend scout meetings.

The troop is a forceful example of the rural boy scout advancement in northern Minnesota. The boys meet once a week in the basement of the

church at Central, miles from their farm homes. While the majority of the boys walk, a number ride horseback to and from the meetings and others drive "Dobbin" from a buckboard.

Scoutmaster Scofield, a farmer residing at Central, has trained the boys in the scout requirements under the

supervision of B. Perry Newton, scout executive. Central is located about 12 miles northwest from Staples.

PARACHUTES COLLIDE; ONE CADET KILLED

San Antonio, Texas, April 23.—(U.P.)—The highest emergency parachute jump on record was made at Kelly field here today when Cadets J. Henderson and J. M. Swisher, collided 9,000 feet up. Henderson was killed but Swisher made a safe descent in his parachute.

It was believed by army officers that Henderson was trapped in his plane or knocked unconscious by the collision.

The student flyers were flying pursuit planes in close formation in high altitude maneuvers when the accident occurred.

Henderson's home was in Seattle, Wash. Swisher lives at Dessie, Ind.

A SMALL house, so planned as to give an impression of greater space than it really has, is highly desirable in this age when the mistress of the home is trying to live a many-sided well-balanced life, falling between the two extremes of household drudgery on the one side and a butterfly existence on the other.

The charming, ultra-modern bungalow here shown is an excellent example of this type of house. It is small enough to be moderate in price and to conserve housework, yet its rooms are so arranged as not to seem cramped. There is, for instance, an arched opening between living room and dining room, which helps to give the effect of more space in what is really a small area. The living room itself, occupying about two-thirds of the front of the house, conveys a pleasing suggestion of spaciousness. The other rooms, though considerably smaller, are light and well-ventilated, and not one of them gives you the feeling that you couldn't "swing a cat" in it!

Arresting Features

Much of the charm of this little house comes from the row of small-paned casement windows across the living room front, and the matching door and wide window at the center and opposite end of the front. Every room has cross-ventilation. There is picturesque beauty, too, in the deep-bruised arch above the front door and the narrow lattices flanking this entrance, which is approached by three brick steps. The house,

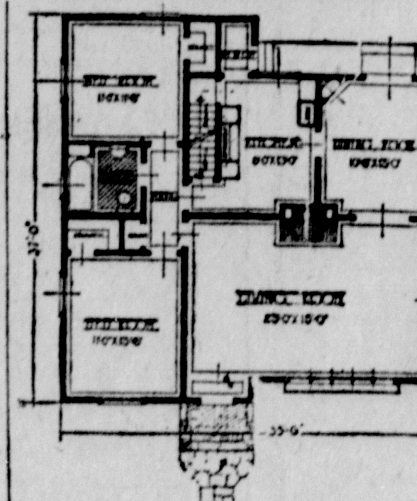

itself, is elevated upon a terrace, to which steps lead up from the sidewalk.

The broken roof-line is another prepossessing feature. The small peak above the front bedroom is faced with wide clapboards like the body of the house, and has a coquettish little window which ventilates the broad attic space indicated by the steeply sloping roof covering the rest of the house, its presumable peak cut squarely off, thus giving the roof-line a piquant irregularity. The chimney-top peers jauntily over one long, sloping line of this roof area.

Appropriate Color Schemes

It is easy to vision a number of delightful color schemes for this pretty little house. Being small, it can stand a light shade of paint for the siding and a rather gay trim. For example, the walls and the small peak of clapboards might be painted a light gray or fawn, the roof red, the door-and-window trim white, and the long window-box under the casement the same cheerful red as the roof.

Or, a rich ivory might be chosen for the body of this saucy bungalow, with jade green for the roof and trim. Equally pleasing would be a light sienna trimmed with white, and a brown roof; while salmon-color, with roof and trim painted a rich coffee shade, is another charming combination. Any very striking color scheme should be modified to harmonize with those of the houses built closely on each side.

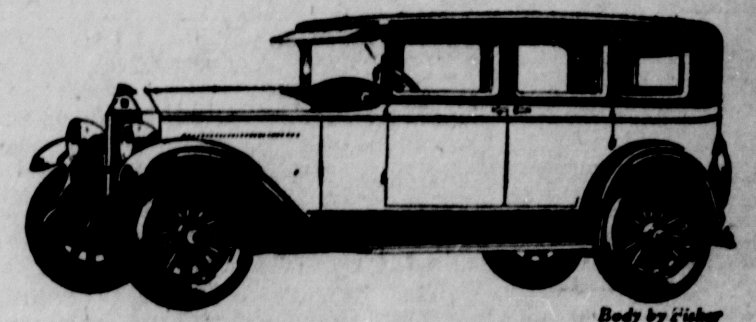

FLOOR PLAN
Convenience and Harmony

The plan of this bungalow shows one bedroom next to the living room, and another at the rear of the house on that side; the bathroom being between the two bedrooms, but entered only from the hall. The front door of the house opens directly into the living room, and there is a good-sized fireplace on the opposite side of this room. Back of it are the dining room and kitchen, opening into each other. The dining room has an attractive corner cupboard, and French doors which open onto a terrace at the rear. The kitchen has conveniently arranged closet-space, and economy of steps has been considered in the placing of sink and range.

This cleverly designed little bungalow may be said to be the last word in modern good taste and completeness.

"DIAMOND JUBILEE WEEK" AT THE LYCEUM THEATRE

Last Time Tonight
Special No. 1

A fascinating picture of life inside the walls of the great military academy—its loves, thrills, humor, drama. William Haines will win your heart as the breezy youth who finds that West Point discipline interferes with love and football.

Haines hands you a flock of laughs in this one! And the real Army football scenes will get you up cheering!

Even better
than "Tell It
To The Marines"
and "Slide
Kelly Slide!"

William Haines

STANLEY VANEK TO ESTABLISH HERE

Sale of E. S. Houghton Jewelry Store
to Former Resident Announced
Today

TO OPEN TOMORROW

Mr. Houghton and Family to Move
Soon to Fruit Ranch at River-
side, Calif.

Edwin S. Houghton, jeweler and optician in Brainerd for the past 23 years, announced today the sale of his establishment at 211 South 6th Street, to Stanley Vanek, of Seattle, Wash., formerly jeweler and engraver in Brainerd.

Mr. Vanek will occupy his new jewelry store location tomorrow morning. Like Mr. Houghton, he has had many years of experience in his profession.

Mr. Houghton stated today that he and his family planned to move to their fruit ranch at Riverside, Calif., as soon as arrangements can be made for the sale of their lake property and home.

BRAINERD
25 YEARS AGO

From the Daily Dispatch

April 23, 1903

Superintendent Blanchard, of the Minnesota division, came in from the south this afternoon accompanied by Superintendent of Bridges Yager. Mrs. Yager also came up from Minneapolis and will visit for a short time with her parents, Mr. and Mrs. R. K. Whiteley.

Mrs. W. P. Jewett arrived in the city this afternoon from St. Paul and will be the guest of Mrs. W. H. Gemmell.

Chairman Adair of the entertainment committee of the Brainerd lodge E. P. O. E. has announced committees for the party to be given on Friday evening for the members of the order and their ladies in the Elk's hall. They are as follows: reception, Dr. and Mrs. Werner Hemstead, H. J. Halsted, Miss Edna Halsted, H. D. Treglawny and Mrs. Bessie Treglawny, Mr. and Mrs. W. A. Fleming, and Mr. and Mrs. F. A. Farrar. Floor, Dr. B. A. Watkins and Thabes. Reception, F. S. Parker, H. P. Dunn and Dr. Frederick. Music, A. L. Webb, S. F. Alderman and E. O. Webb. There will be cards and dancing and refreshments will be served.

Kearny McDonalds, who has held a position in the state senate this winter, returned home this morning the legislature having adjourned.

Joseph Murphy left this afternoon for St. Paul where he expects to go to work in a short time. He has resigned his position at the N. P. shops.

RIDE HORSEBACK TO ATTEND BOY SCOUT MEETINGS

Transportation methods during the
pioneer days of Minnesota are being

re-enacted by a group of boy scouts from the neighborhood of Central as they ride horseback, drive a buckboard or walk miles each week to attend scout meetings.

The troop is a forceful example of the rural boy scout advancement in northern Minnesota. The boys meet once a week in the basement of the

church at Central, miles from their farm homes. While the majority of the boys walk, a number ride horseback to and from the meetings and others drive "Dobbin" from a buckboard.

Scoutmaster Scofield, a farmer residing at Central, has trained the boys in the scout requirements under the

supervision of B. Perry Newton, scout executive.

Central is located about 12 miles northwest from Staples.

PARACHUTES COLLIDE; ONE CADET KILLED

San Antonio, Texas, April 23.—(U.P.)—The highest emergency parachute jump on record was made at Kelly field here today when Cadets J. Henderson and J. M. Swisher, collided 9,000 feet up. Henderson was killed but Swisher made a safe descent in his parachute.

It was believed by army officers that Henderson was trapped in his plane or knocked unconscious by the collision.

The student flyers were flying pursuit planes in close formation in high altitude maneuvers when the accident occurred.

Henderson's home was in Seattle, Wash. Swisher lives at Des Moines, Ind.

Charming and Complete

Courtesy California Redwood Association.

A SMALL house, so planned as to give an impression of greater space than it really has, is highly desirable in this age when the mistress of the home is trying to live a many-sided well-balanced life, falling between the two extremes of household drudgery on the one side and a butterfly existence on the other.

The charming, ultra-modern bungalow here shown is an excellent example of this type of house. It is small enough to be moderate in price and to conserve housework, yet its rooms are so arranged as not to seem cramped. There is, for instance, an arched opening between living room and dining room, which helps to give the effect of more space in what is really a small area. The living room itself, occupying about two-thirds of the front of the house, conveys a pleasing suggestion of spaciousness. The other rooms, though considerably smaller, are light and well-ventilated, and not one of them gives you the feeling that you couldn't "swing a cat" in it!

Arresting Features

Much of the charm of this little house comes from the row of small-paned casement windows across the living room front, and the matching door and wide window at the center and opposite end of the front. Every room has cross-ventilation. There is picturesque beauty, too, in the deep-embossed arch above the front door and the narrow lattices flanking this entrance, which is approached by three brick steps. The house,

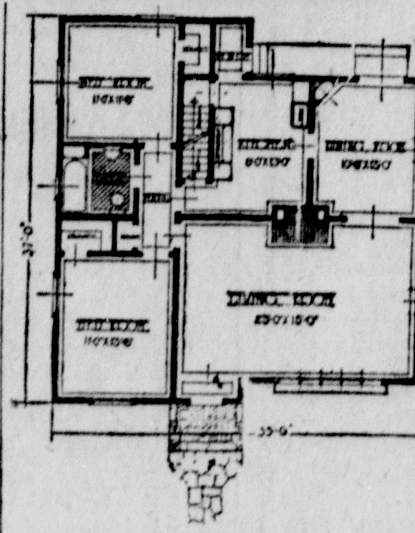

itself, is elevated upon a terrace, to which steps lead up from the sidewalk.

The broken roof-line is another prepossessing feature. The small peak above the front bedroom is faced with wide clapboards like the body of the house, and has a coquettish little window which ventilates the broad attic space indicated by the steeply sloping roof covering the rest of the house, its presumable peak cut squarely off, thus giving the roof-line a piquant irregularity. The chimney-top peers jauntily over one long, sloping line of this roof area.

Appropriate Color Schemes

It is easy to vision a number of delightful color schemes for this pretty little house. Being small, it can stand a light shade of paint for the siding and a rather gay trim. For example, the walls and the small peak of clapboards might be painted a light gray or fawn, the roof red, the door-and-window trim white, and the long window-box under the casement the same cheerful red as the roof.

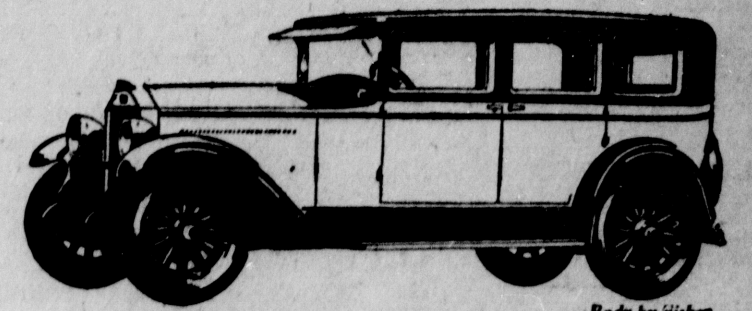

Or, a rich ivory might be chosen for the body of this saucy bungalow, with jade green for the roof and trim. Equally pleasing would be a light sienna trimmed with white, and a brown roof; while salmon-color, with roof and trim painted a rich coffee shade, is another charming combination. Any very striking color scheme should be modified to harmonize with those of the houses built closely on each side.

Convenience and Harmony

The plan of this bungalow shows one bedroom next to the living room, and another at the rear of the house on that side; the bathroom being between the two bedrooms, but entered only from the hall. The front door of the house opens directly into the living room, and there is a good-sized fireplace on the opposite side of this room. Back of it are the dining room and kitchen, opening into each other. The dining room has an attractive corner cupboard, and French doors which open onto a terrace at the rear. The kitchen has conveniently arranged closet-space, and economy of steps has been considered in the placing of sink and range. This cleverly designed little bungalow may be said to be the last word in modern good taste and completeness.

But is

VALUABLE TOURIST BUSINESS

In a letter to the Brainerd Dispatch, John W. Harrison of Harrison & Start, owners of Pine Beach on lower Gull lake, writes concerning the growth and value of the tourist business and brings out these salient points:

I read with great interest the editorial of the 16th "An Industry's Amazing Growth," and concur most heartily with the views so well expressed in it. Incidentally it reminded me that I have intended to congratulate you on the general soundness and clarity of your editorials, and the fact that they are unusually readable.

There is no local issue in Brainerd needing more persistent hammering on than that of how best to take advantage of the enormous new revenue possible from the tourist business—now drifting by. Doubtless you have outlined a series of editorials covering it. Some thoughts have occurred to me regarding it, and perhaps among them are some you could use—rewritten in your own keener style.

Here is the tourist business, a tremendous new self-created revenue, needing only a systematic effort to be centralized in and around Brainerd. In the past this business has been flowing THROUGH Brainerd, instead of INTO the city. In place of being the "gateway" to the resort country, Brainerd should be the head and center of the resort activities of the state.

Brainerd's great problem is how best to RETAIN this new business within her immediate trade territory—not just to stop it. So far she has been content to pick up the few crumbs of trade dropped in passing—and even this has been enough to change the peak of business from fall to midsummer. If these crumbs taste good, why not go after the biggest part of the whole cake?

For many years the Northern Pacific railroad and the farming territory has kept Brainerd a substantial town of 10,000. How better help the farmer than by giving him a direct market—or the railroad than by creating new freight and passenger business? Both would be accomplished by localizing the tourist business—now passing through.

If Brainerd will realize the enormous possibilities in this new business it is not hard to visualize her as ranking next to the Twin Cities and Duluth in population. She should be the center of a summer population of several hundred thousand people. Every phase of the tourist business should be analyzed and taken care of—from a 40-acre tourist camp on a good lake up to town and lake hotel facilities that would permit her to go after the biggest of the summer conventions.

Brainerd, with the advantage of being the largest city in the pine woods lake region, is so located that she should retain in her immediate trade territory at least one-fourth, probably more, of the vacationists—now estimated at a million and a half people and constantly increasing. The constant summer population in Brainerd's territory can readily be multiplied by ten. Any business man can see what that would mean.

A SERMON IN THE NEWS

A NEWS item recently appearing in the papers of this and other states sent out from Fergus Falls says:

Examination of the effects of Rangvald E. Koefed, who was buried at the expense of the county following his death near Comorant lake, revealed he had invested \$39,500 in worthless stocks.

Koefed had invested his life's savings in 53 mining companies, it was indicated by papers found after his death.

All stocks were worthless, according to authorities. Koefed died without leaving sufficient property to pay for his burial.—Bemidji Sentinel.

Such tragedies could easily be avoided if people would only consult the local banker when approached by salesmen of stocks and bonds. A good way to get rid of the average stock salesman is to speak as follows: "Reduce your proposition to writing. I will then submit the matter to my banker and if he says it is safe and sound, I will consider it." We wish to particularly warn our readers against the friend who wants to let you in on a good deal, limited to just a few "good fellows like yourself."—Stillwater Post-Messenger.

THE FORMATIVE PERIOD

WITH a view of ascertaining the influence of moving pictures on children during the formative period, investigators find that more than half the tickets sold are used by children.

Another investigation conducted in a number of grammar schools revealed the fact that the children were more familiar with bootlegging systems than their parents.

Still another investigation reveals that the columns and columns of dizzy dope peddled by prize fight promoters are eagerly absorbed by small boys and some girls, creating an abnormal ambition to follow in the footsteps of Jack Dempsey or some other pug in preference to going to the U. S. Senate or the White House.

With these almost unrestricted influences and opportunities in active operation on every hand during the formative period, youth seems to be successfully solving its own problems and the boys and girls of 1928 are to be congratulated on the high standard of decency and deportment that they demand from their associates.—Staples World.

EFFICIENCY, FAITHFULNESS REWARDED

THE Little Falls Daily Transcript says editorially:

The Brainerd city council has voted to give ten of its firemen and policemen a \$10 a month raise in salary. Two councilmen voted against the raise and in explaining his vote one of the aldermen stated that he was not against the raise but did not favor it because the men affected had not made the request for an increase.

It should not be necessary for a faithful and efficient employee to ask for an increase in salary whether he works for a private concern or a municipality.

MOTHER'S DAY AT UNIVERSITY

TEN thousand mothers of students at the University of Minnesota will be invited to attend the fourth annual Mother's Day, set for Saturday, May 12th.

Each year since Mother's Day was begun at Minnesota, between 1,000 and 2,000 mothers have turned out for the university's "open house" during which the campus, the classrooms and laboratories, the special buildings and the students' living quarters are thrown open for the visits and inspection of that universal favorite of young and old—mother.

"WEST POINT" IS FULL OF MILITARY THRILLS

Cheering Crowds, Army-Navy Football Contest, Spectacular Maneuvers and Dress Parade at West Point Prove Fascinating

(By CLARENCE DAHLEN)

Cheering crowds—the thrill of the great Army-Navy football game—dress parade at West Point, with the cadet corps in spectacular maneuvers; the romantic old battlements of the great school for Uncle Sam's officers as a background for a romance as sweet as a zephyr—these are some of the ingredients for "West Point," William Haines' new vehicle playing at the Lyceum theatre last time tonight.

It is a short story of youth, love and romance—with laughs and thrills, comedy and heart throbs deftly blended into an evening of glorious entertainment. And, of course—there's William Haines.

As the "wise cracking" young football star who comes to West Point to learn, through bitter experience, what the spirit and tradition of the cadet corps means, Haines

has an ideal role. He exercises his

WILLIAM HAINES and JOAN CRAWFORD in "WEST POINT"

unique gifts for comedy in the opening scenes, showing his training at West Point, and plays a sensational game of football in the big Army-Navy game, staged during the actual contest.

The bulk of the picture was actually taken at West Point, with the cadets as a huge cast. The dress parade and other maneuvers are thrilling and inspiring.

to know the real value of MEADOWWASHING

ACCEPT THIS FREE HOME TEST

when you clean house

THERE'S no time like house cleaning to prove the economy and ease of doing laundry at home.

White curtains—wool blankets—rag rugs! What an opportunity to test the wash-ability of a home laundering device. Or lack of it.

It is only natural that the washer making water do all the work—the washer eliminating clothes friction is the one to astonish women who have owned washing machines for years.

Phone your Meadows dealer without delay. We even suggest a previous test of any other home washer. Regardless of price or its "advertised" merits.

This record washer at a price

We guarantee that Meadows, the washer that makes water do all the work, launders the same amount of clothes in less time than any other washer in the world.

Naturally you wonder at this record washing capacity with clothes friction entirely eliminated. The magic water impeller of Bakelite is the answer. This feature combined with novel lines in the Meadows tub means super water action that clothes thrive on!

Makeshift washers sold at a price do a makeshift job. Half the convenience of home laundering is lost if your washer is "choosy"

The lowest priced washer able to wash completely 50 to 60 lbs. of clothes per hour

Piles Go Quick

Piles are caused by congestion of blood in the lower bowel. Only an internal remedy can remove the cause. That's why salves and cutting fail. Dr. Leonhardt's Hem-Roid, a harmless tablet, succeeds, because it relieves this congestion and strengthens the affected parts. Hem-Roid has given quick, safe and lasting relief to thousands of Pile Sufferers. It will do the same for you or money back. H. P. Dunn, Johnson's Pharmacy and druggists everywhere sell Hem-Roid with this guarantee. —Adv.

to know the real value of MEADOWWASHING ACCEPT THIS FREE HOME TEST when you clean house

THERE'S no time like house cleaning to prove the economy and ease of doing laundry at home.

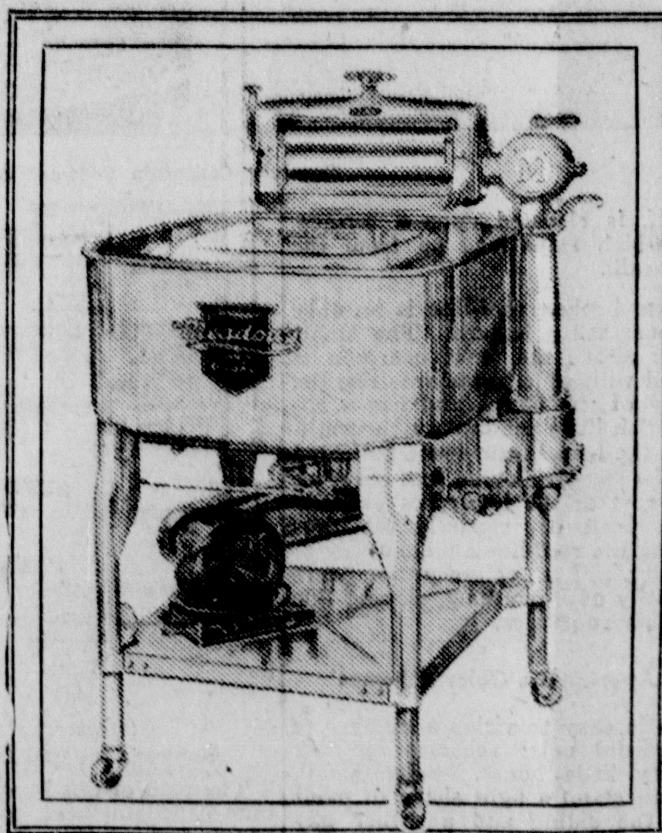

White curtains—wool blankets—rag rugs! What an opportunity to test the wash-ability of a home laundering device. Or lack of it.

It is only natural that the washer making water do all the work—the washer eliminating clothes friction is the one to astonish women who have owned washing machines for years.

Phone your Meadows dealer without delay. We even suggest a previous test of any other home washer. Regardless of price or its "advertised" merits.

This record washer at a price

We guarantee that Meadows, the washer that makes water do all the work, launders the same amount of clothes in less time than any other washer in the world.

Naturally you wonder at this record washing capacity with clothes friction entirely eliminated. The magic water impeller of Bakelite is the answer. This feature combined with novel lines in the Meadows tub means super water action that clothes thrive on!

Makeshift washers sold at a price do a makeshift job. Half the convenience of home laundering is lost if your washer is "choosy"

The lowest priced washer able to wash completely 50 to 60 lbs. of clothes per hour

KEECH WRESTS WORLD'S SPEED CROWN FROM THE ENGLISH

YANKEE RACER BREAKS RECORD AT DAYTON BEACH

DRIVES TRIPLEX RACER AVERAGE SPEED OF 207.5526 MILES PER HOUR

AUTOMOBILE ASSOCIATIONS TIMING BROKE ON FIRST ATTEMPT

Daytona Beach, Fla., April 23.—(UP)—An angry young American racing driver who swore "I'll show 'em I can break it," had today wrested the world's speed crown from Great Britain. Ray Kech, 27, drove his Triplex racer an average speed of 207.5526 miles per hour on the Daytona Beach sands Sunday to keep his promise.

His record smashing dashes were made following failure of the Automobile Association's timing device to function in a previous attempt that Kech claimed was itself a record breaker.

"I'll show 'em again—you'd think this was a picnic," Kech shouted and jumped into his car. It roared with the wind at a clocked time of 213.903 miles. He turned around at the end of the course and roared back. His time for the measured mile was 201.903—average 207.5526.

The previous record was made in February's international speed trials by Capt. Malcolm Campbell, Britisher—time 206.95 miles per hour.

Kech's record was in competition again today. Frank Lockhart, weather conditions permitting, will attempt to beat his fellow countryman's mark. Lockhart will drive his rebuilt Blackhawk, in which he was injured during a February attempt at the record. The 16 cylinder black streak somersaulted into the ocean, pinning Lockhart.

TOPNOTCHERS MEET

N. P. STOREROOM

The American Railway Express Co. will attempt to tighten its hold on first place in the kittenball league tonight when they meet the strong N. P. Storeroom team.

The express company has defeated Nash-Finch and J. C. Penney Co., while the Storeroom has beaten the O'Brien Mercantile Co.

NAMES OF WINNERS IN BOWLING EVENT ARE GIVEN

TUNNEY HEAVIER THAN AT ANY TIME IN CAREER

New York, April 23.—(UP)—Heavier than at any time during his career, Gene Tunney, heavyweight champion, came to town today from Riverdale, where he had visited his mother upon his return from Miami Beach.

Tunney will spend several days in New York and then go to Speculator to start training for his fight with Tom Heeney in July.

The champion announced he had no intention of marrying as long as he retains the title, explaining:

"Wouldn't I be a mug to give up a business bringing me in three quarters of a million dollars a year?"

Watching the Scoreboard

By United Press

Yesterday's Hero—Percy Jones, veteran left-hander of the Chicago Cubs, who turned in his second brilliant pitching performance of the season, holding the Pittsburgh Pirates to five hits and beating them, 3 to 2. As a result, the National league champions today share the cellar with the Boston Braves, while the Cubs have moved up into third place. The Pirates protested the game.

The Boston Red Sox moved up in the American league standing by winning a slugging match from the Washington Senators, 8 to 5, sweeping the series.

The Red Sox passed the Detroit Tigers, who dropped the opening game of a series with the White Sox, 9 to 3.

The Cleveland Indians, whose play has been the surprise of the season, increased their lead in the American league race by defeating the St. Louis Browns, 2 to 1. Both of Cleveland's runs followed infield taps which the St. Louis defense could not get to the plate in time to prevent the scoring.

Rain and cold prevented all the other scheduled games.

PETE LATZO TO MAKE DEBUT AS LIGHT HEAVYWEIGHT

New York, April 23.—(UP)—Pete Latzo, former welterweight champion, will make his New York debut as a light heavyweight tonight when he encounters Tony Marullo of New Orleans in a ten round bout.

This is Olympic Week, when an attempt is to be made to raise the balance of \$400,000 required to send Uncle Sam's athletic nephews and nieces to Amsterdam next summer.

General Douglas MacArthur, president of the American Olympic Committee, expects his collectors to go over the top this week and shake down a slightly reluctant nation for the necessary funds.

There is no reason why the sum of \$400,000 should be difficult to raise, but money comes forth slowly at this time of year. Next July, when interest in the 9th Olympiad is at fever heat and Americans await eagerly the progress of the wearers of the Stars and Stripes at Amsterdam, you could raise a million and never hear a squawk from the contributors.

Those interested in sending a strong team to the Olympics this year must contribute this week, however. Next July, it will be too late.

A number of other nations have had their troubles in raising the funds necessary to provide representation at the 9th Olympiad. France and Great Britain nearly despaired of sending teams, so slowly did the funds appear.

In France, the necessary francs were voted by the Chamber of Deputies; in England, as in the United States, the Olympic fund is raised by what is known as "popular subscription."

It doesn't cost as much to send an English team to Amsterdam, nor a French team, as it does one from the United States. The American Olympic Committee had to charter a steamship for the voyage over, the duration of the games and the return trip.

Wait until 1932, and undoubtedly we will find France and Great Britain even more reluctant to put up the money to send athletes on the long journey to Los Angeles. This really is a serious matter to which it might be well for those who have charge of the 1932 games to give some attention when they get to Amsterdam.

It is all very well for Los Angeles to wish to stage the 10th Olympiad, but the expense involved is certain to hamper the representation of many nations which took part in the revival of the games in 1896 and in subsequent Olympiads.

The chief concern of the American public, for the moment, however, is to dig down and give up. The collectors will take cash, checks, pledges or buttons. The main thing is to be able to announce about bedtime next Saturday that the \$400,000 is safely promised.

Dan Ferris, new secretary of the Amateur Athletic Union, tells me he has little doubt that the fund will be raised within the week.

There will be some pre-Olympic activity to help stir up interest in the games, in addition to speeches and mass meetings.

The final boxing tryouts are to be held in Boston this week, and on Friday and Saturday come the Penn Relays. The latter carnival contains one official Olympic tryout on its program—the decathlon. The first five men in this event will be named for the American team, although their number may be reduced to three later on.

The Penn Relays this year will be followed closely by the coaches of the American team, each of whom will be on the lookout for promising material which may be developed in time for the tryouts and the trip to Amsterdam.

DICK BEALE WINS THE CITY HANDICAP SINGLES TOURNEY

WITH A HANDICAP OF 27 PINS PER GAME ROLLS 824 TOTAL FOR FOUR GAMES

McNAMARA FINISHES SECOND WITH 777 PINS WITH RARDIN THIRD, 776 PINS

The City Handicap Singles tourney came to a close last evening with the 9:30 o'clock shift.

Dick Beale, with a handicap of 27 pins per game, took first place with an 824 total.

McNamara, carrying 13 pins per game, finished in second place with 777, while Rardin, carrying 10 pins per game, took third place with 776.

Fritz Hass, carrying 25 pins per game, was right on the heels of the leaders with 775.

Next Saturday and Sunday the Straight Away Singles championship and the Handicap Doubles will be run.

The singles will be run off with only actual pins to count, while the doubles will be run with a handicap limit of 20 pins per game per man.

DECORATION DAY SERVICES PLANNED

Committees Named to Handle the Various Phases of Day's Program

SERVICES AT EVERGREEN

Salute to be Given at Mississippi River Bridge, Followed by Parade

Plans for observance of Decoration Day, May 30, were taking definite form today as committees continued with their instructed special work toward minute details for the parade, gun salutes, and special services at the Evergreen cemetery where lie the remains of soldiers who gave their lives for the United States in wars.

Tentative plans announced today call for an order of program similar somewhat, though more extensive, to observances on Decoration Day in the past.

Earl H. Rhodes, commander of the local post of the American Legion has been appointed general chairman of arrangements. At a meeting recently called to discuss plans representatives were present from the American Legion, Ladies Auxiliary, G. A. R., D. A. R., Women's Relief Corps, Public Schools and the city.

William V. Turcotte will be marshal of the day with O. A. Peterson commander in charge of the American Legion including gun squad and bugle corps. Superintendent W. C. Cobb will have charge of the schools presentation in the program. Commander Albert Fox of the G. A. R. and Albert Englund will have charge of the cemetery arrangements. Mayor F. E. Little and the American Legion Auxiliary will be in charge of the bands while other committee heads named follow: housing and publicity, W. C. Cobb, Mayor F. E. Little and Clyde Barker; floral arrangements and decorations, representatives of the Women's Relief Corps and D. A. R.; general steering committee, E. H. Rhodes, D. H. Fullerton as chairman of the Legion committee and W. V. Turcotte and O. A. Peterson.

The speaker of the day will be provided by the American Legion.

Suitable services will be held at the Evergreen cemetery and earlier at the Mississippi river bridge, Laurel street for the sailors. In the event of rain, the services will be conducted at the Park theatre.

LIVESTOCK, PRODUCE AND GRAIN MARKETS

MINNEAPOLIS CLOSING CASH PRICES

SPRING WHEAT—No. 1 Dark Northern, \$1.48½ to \$1.97½; to arrive, \$1.47½.

Outdoor Iron Furniture

LACQUERED iron furniture has always been one of the most popular types for garden, lawn, or terrace, because of its qualities of stability and permanence. It is too heavy to be tipped over by wind-storms, and its lacquered surface is impervious to dew, rain or snow. It can be left out, all winter, without danger of rusting.

Formerly, however, it was not particularly decorative because usually given a natural black finish. We have learned that it may be a means of adding colorful touches to the grounds around a house, if lacquered some gay hue—generally light red, orange or yellow, in effective contrast to the dominant green of grass and foliage. An outdoor table usually stands beneath a large umbrella in harmonizing colors. In

a garden full of vari-colored flowers, a deep cerulean blue makes a picturesque finish for an iron bench, or tea-table and chairs. Charming, too, an orchid table and chairs placed within a white pergola overhung with vines! Garden seats often are lacquered white.

Part of the Picture

On a brick or stone terrace, iron furniture should harmonize in color with awnings or house-trim, since it is so close to the house as to be a part of the picture. For example, if a house has a white finish and a green trim, and awnings with green and orange stripes, the terrace furniture should be lacquered either green or orange. But it may be finished in any bright hue, when the house is in neutral tones and has no colorful awnings.

\$1.47½. No. 1 Northern, \$1.47½; to arrive, \$1.46½. No. 2 Dark Northern, \$1.47½ to \$1.91½. No. 2 Northern, \$1.45½ to \$1.55½. No. 3 Dark Northern, \$1.43½ to \$1.83½. No. 3 Northern, \$1.43½ to \$1.52½.

CORN—No. 2 Yellow, \$1.07 to \$1.08. No. 3 Yellow, \$1.04 to \$1.06; to arrive, \$1.04. No. 4 Yellow, \$1.01 to \$1.03. No. 5 Yellow, 97 to 99c. No. 3 Mixed, \$1 to \$1.01. No. 4 Mixed, 97 to 99c. No. 5 Mixed, 94 to 96c.

OATS—No. 2 White, 59½ to 61½c. No. 3 White, 58½ to 60½c; to arrive, 58½c. No. 4 White, 57½ to 59½c.

BARLEY—Choice to fancy, 95 to 96c; medium to good, 90 to 94c; lower grades, 86 to 89c.

RYE—No. 2, \$1.25½ to \$1.26½; to arrive, \$1.25½.

FLAXSEED—No. 1, \$2.23½ to \$2.31½; to arrive, \$2.23½.

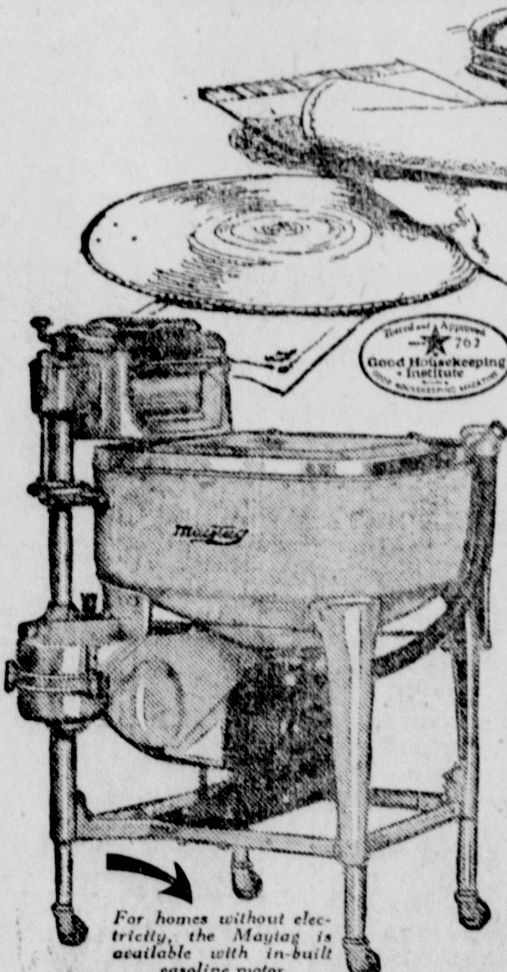

Confederate Memorial

After the evacuation of Richmond, the archives of the Confederacy were removed to Danville, Va. The building used by President Jefferson Davis as his last capitol became a Confederate memorial and museum.

Legal Phraseology

In modern usage a discrimination has been made between the two words, "devise" and "bequeath," and "devise" is used for the conveying of real property and "bequeath" for the conveyance of personal property.

The New Maytag Makes House Cleaning Easier

Wash Heavy Blankets Quilts, Rugs or Draperies this Easy Way

BECAUSE its large, roomy, cast-aluminum tub holds four gallons more than ordinary washers, the Maytag handles the bulky things of housecleaning time easily. It will flush out, with surprising speed, all the dirt from comforters, blankets, rag rugs, etc. It will wash your fine draperies and curtains as carefully as if washed by hand.

Now is the time to make a free trial test of the Maytag. See how long the seamless, cast-aluminum tub keeps the water hot. See the convenient, all-metal, Roller Water Remover—a new, exclusive Maytag feature. It sets close to the water line, making it easy to put the heavy blankets through. The tension adjusts itself, and the balloon-type rolls remove the surplus soap and water evenly from every part of the fabric.

For example, if a house has a white finish and a green trim, and awnings with green and orange stripes, the terrace furniture should be lacquered either green or orange. But it may be finished in any bright hue, when the house is in neutral tones and has no colorful awnings.

FLAXSEED—No. 1, \$2.23½@2.31½; to arrive, \$2.23½.

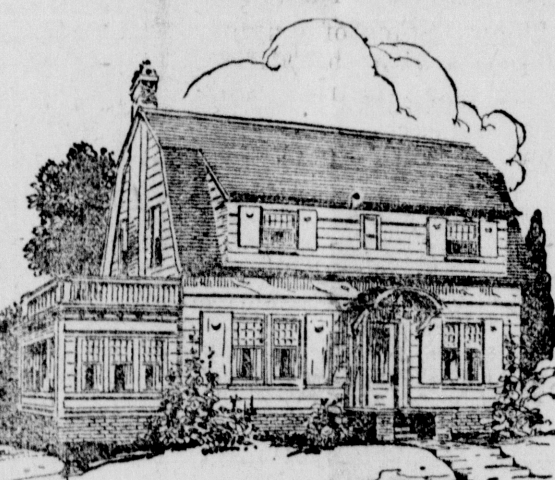

Confederate Memorial

After the evacuation of Richmond, the archives of the Confederacy were removed to Danville, Va. The building used by President Jefferson Davis as his last capitol became a Confederate memorial and museum.

Legal Phraseology

In modern usage a discrimination has been made between the two words, "devise" and "bequeath," and "devise" is used for the conveying of real property and "bequeath" for the conveyance of personal property.

The New Maytag Makes House Cleaning Easier

Wash Heavy Blankets Quilts, Rugs or Draperies this Easy Way

BECAUSE its large, roomy, cast-aluminum tub holds four gallons more than ordinary washers, the Maytag handles the bulky things of housecleaning time easily. It will flush out, with surprising speed, all the dirt from comforters, blankets, rag rugs, etc. It will wash your fine draperies and curtains as carefully as if washed by hand.

Now is the time to make a free trial test of the Maytag. See how long the seamless, cast-aluminum tub keeps the water hot. See the convenient, all-metal, Roller Water Remover—a new, exclusive Maytag feature. It sets close to the water line, making it easy to put the heavy blankets through. The tension adjusts itself, and the balloon-type rolls remove the surplus soap and water evenly from every part of the fabric.

ALLEGED TO HAVE BEATEN HIS WIFE

Lawrence L. Marshall, 23, to Be Given Insanity Hearing This Afternoon

ARRESTED ON SATURDAY

Police Report Man Struck Wife With Glass Shelf, Scissors and Plunger

Arrested at his home in North-east Brainerd Saturday evening after he had beaten his wife severely. It is reported, Lawrence L. Marshall, 23, was to be brought before Judge L. B. Kinder at an insanity hearing this afternoon at 2:30 o'clock.

Police officials reported this morning that Marshall looked himself and his wife in the bathroom, then struck her over the head with a glass shelf, hit her over the arm with a plunger and made a thrust at her with a scissors which nicked her elbow.

Mrs. Marshall who was home visiting her husband over the week end from Minneapolis made her escape by jumping through the bathroom window which was on the first floor of the house, police reported. Further attacks on his wife were prevented by the appearance of Oscar C. Marshall, father of Lawrence L. Marshall.

The petition for the insanity hearing was signed by Oscar C. Marshall.

BLIND LAKE

Mrs. Leslie Shepard returned home after a week's visit at the home of her parents, Mr. and Mrs. Ounett.

Mrs. L. O. Pick spent one day last week as the guest of her sister, Mrs. Ed Johnson.

Miss Evelyn Fick was an overnight guest at the home of Mr. and Mrs. Dwight Sherwood.

The J. H. Allen family moved to the Henry Rush farm two miles from Pine River. Carl Hildebrand helped move the cattle and Fred Sweet moved their household goods in the truck.

Jim Shepard has purchased a new tractor from the Backus agency.

The mail carrier was two days making the trip on horseback. It took him Thursday and Friday. Sixty miles is quite a trip on horseback.

Mrs. C. Hildebrand was a visitor at the home of Mrs. John Douber on Thursday afternoon.

There was ten inches of snow out here on Wednesday. It seems as though old man winter isn't ready to depart yet.

Daddy Shepard was a guest at the home of his sons last Sunday.

SUCCESSFUL CAMPAIGN

Louis Hostager Sells 48 Meadows Washing Machines in Brainerd Territory Last Year

The Meadows washing machine agency is handled by Louis Hostager and last year he sold forty-eight machines, with an increase of this year's sales so far. The Meadows washing machine has two main points which make it among the best on the market. The agitator is a bakelite impeller, a hard glossy substance which does not wear the clothes for when it is wet it is as slippery and smooth as a wet soapy mirror. Clothes cannot catch or tear. The second feature, the square steel tub is equipped with a round copper lining which when inserted cuts down the water action over half. The washing machine is equipped for either a gas engine or electricity.

P. A. Rardin, demonstrator and service man, occupies a room in the corner building. A free demonstration will be given at any time.

NOTICE OF TRAFFIC RESTRICTION

Traffic restriction of March 22nd, 1928 will be lifted Tuesday, April 24th on Trunk Highway No. 2 between Deerwood and McGregor.

The following Trunk Highways remain closed:

SWANS FIND REST AT MILLE LACS LAKE

Make Bay at Indian Trading Post Annual Stopover on Way North

DUCKS BLACKEN WATERS

Many Visit Post in Early Season; Ice Cakes Pile High on the Shores

Floating gracefully on top of the rippling waters of Mille Lacs lake in a pretty cove bordering the picturesque Mille Lacs Indian Trading Post are fourteen 'Whistler' swans, these days, their long white necks and well shaped heads arched two feet above their sparkling white bodies.

The swans proved never ending curiosity to the many visitors at the Post yesterday. They are located a considerable distance from the shore and in order to catch a good view one must use field glasses.

Harry D. Ayer, proprietor of the Post, explained that the swans have been coming to the lake each spring now for the past five years. They remain there until the weather becomes warmer and then leave for points farther north.

A few feet from the swans can be seen hundreds of ducks, blackening the water only a short distance from the shore. They also are well protected and will undoubtedly leave soon for the far north.

Spring tourists yesterday afternoon visited the Post and inspected the interesting curio room where thousands of interesting Indian handmade works are on exhibition and for sale.

Assisting Mr. and Mrs. Ayer at the trading Post are two Indian maidens. Both are well educated, well mannered and highly capable of meeting the public.

Over a well arranged meal of tasty wholesome foods last evening, Mr. and Mrs. Ayer, chatted with a representative of the Brainerd Daily Dispatch concerning the forthcoming busy tourist season, and pointed out interesting historical spots on the lake shore in view of the dining room and told of their early experiences at the lake.

Much of the ice in the lake has been piled high on the shore while in some spots the ice towers 25 feet high.

FACES CHARGE OF TAKING AUTO

Wilmer Harris, 18, Arrested in Crosby Last Evening by Deputy Sheriff

HEARING TOMORROW

Alleged to Have Taken Car of C. A. Iverson Yesterday Morning Here

Wilmer Harris, 18, was arrested in Crosby last evening at 7:30 o'clock by Deputy Sheriff Charles Oberg and placed in the county jail where he awaits arraignment tomorrow morning in municipal court on the charge of taking a car without the consent of the owner.

The youth is alleged to have taken the Jewett coach, owned by C. A. Iverson, salesman residing in Brainerd, from in front of the Methodist church yesterday morning at 11:30 o'clock.

Sheriff Claus Theoria was of the opinion today that Harris had taken the car for a joyride, intending to return the car to Brainerd last evening.

Results of the district shorthand and typewriting contest conducted here Saturday have been announced as follows:

Advanced typing, first, Ida Olson, Brainerd; second, Florence Storstad, Crosby-Ironton; third, Florence Wright, Park Rapids.

First year typing, first, Theo. Hall, Crosby-Ironton; second, Dorothy Scharf, Staples; third, Ethel Finne, Brainerd.

Shorthand, first, Florence Wright, Park Rapids; second, Myrtle Wilhelmson, Staples; third, Carrie Johnson, Crosby-Ironton.

Nineteen high school representatives from Brainerd, Park Rapids, Staples and Crosby-Ironton competed. Miss Ruthe, typing instructor at the Brainerd high school, was again elected district manager for the contest.

DAM HEARING CONTINUED

Case of State vs. Joseph Lundborg to be Heard in Municipal Court Thursday

The case of the State vs. Joseph Lundborg, scheduled to have been heard this morning in municipal court, was continued until Thursday. Lundborg faces the charge of burning a dam under circumstances not amounting to arson.

I. O. O. F. OBSERVES 109TH ANNIVERSARY

Members and Families of Unity Lodge to Gather at Hall, April 25th

ARRANGE GOOD PROGRAM

James S. Lombard, Grand Warden of Grand Lodge, Minnesota, Is the Principal Speaker

Brainerd Odd Fellows and members of their families will gather at Odd Fellows hall on the evening of April 25 when Unity Lodge observes the 109th anniversary of the founding of the order in the United States.

The committee in charge, headed by Ray Fredstrom, has been at work for more than three weeks in the preparation of a good program. James S. Lombard, of Minneapolis, Grand Warden of the Grand Lodge of Minnesota, has accepted an invitation to be the principal speaker of the evening, and the committee promises a varied program including musical numbers.

Fitting tribute will be paid to the memory of Thomas Wildley, who with four other members of the order, which originated in England, instituted the first lodge in this country in the city of Baltimore on April 26, 1819.

Out of town members visiting in the city are extended a cordial invitation to attend.

Card of Thanks

We wish to thank our many friends and neighbors for the beautiful floral offerings, and the love and kindness expressed, at the death of our beloved husband and father.

WALTER P. TYRHOLM CO.

DAIRY FACTS

KEEP ALL MILK UTENSILS CLEAN

While no one food is used more universally than milk, it is one of the most easily contaminated by its surroundings, according to Dr. W. G. Sackett, bacteriologist of the Colorado experiment station, who spoke to the dairy and creamery fieldmen on the harmful effects of bacteria in milk and cream.

In an explanation of how dirt gets into milk, Doctor Sackett stated that even milk coming directly from the udder of the cow is not sterile. Quality and length of time milk will remain sweet depends upon the bacterial count which can be kept down by sanitary conditions and cleanliness. Milk is contaminated with bacteria from dirt, hair, straw or manure falling into the milk from the cow's body or from dust settling into the milk pail. This can be lessened by currying cows to remove loose hair, wiping flanks and udder with damp cloth, the use of pails with smaller openings, and care not to feed cows and stir up dust in the barn just previous to milking.

Cement floors and frequent cleaning of stables are also advocated. The milker himself may increase the bacterial contamination of milk through lack of personal cleanliness. Doctor Sackett pointed out. He should wear clean clothing, should himself be free from disease and in perfect condition of health.

One of the greatest sources of contamination in milk is dirty utensils. The cracks become full of dirt and filth which can be removed only by scalding with live steam or scalding hot water. Doctor Sackett showed where the bacterial count of milk in a test was increased from 5,000 per c. c. to 350,000 per c. c. merely through dirty pails, strainers, clarifier tank, clarifier, cooler and filter tanks.

Strainers do not take out bacteria, but merely allow them to wash off from the strained dirt into the milk. Aeration does not lower the bacterial count except through effect of cooling. It does remove off odors and "barny" flavors. Doctor Sackett explained. Milk kept at a temperature below 50 degrees Fahrenheit will remain sweet longer than at a high temperature.

Doctor Sackett pointed out the dangers from disease like tuberculosis, septic sore throat, diphtheria, typhoid fever, etc., through milk produced under unsanitary conditions. Pasteurization will kill disease-producing bacteria and is being demanded more and more. Prevention of unsanitary conditions through cleanliness with milk products is very desirable.

Some Good Grain Rations With Alfalfa and Silage

Some excellent rations that fit in well in a district of Wisconsin where 90 per cent of the farmers are feeding alfalfa hay are presented here-with:

With good silage—14.8 per cent protein ration composed of 700 pounds ground oats, 500 pounds corn or barley, 200 pounds of bran, 200 pounds of oil meal and 200 pounds of gluten feed.

With poor silage—15.8 per cent protein ration composed of 600 pounds ground oats, 400 pounds corn or barley, 200 pounds of bran, 300 pounds of gluten feed.

When a farmer has good corn silage and good quality mixed clover and timothy hay, try this one:

Three hundred pounds ground oats, 200 pounds of bran, 100 pounds of gluten feed, 200 pounds barley and 200 pounds of oil meal.

Feed one pound of grain for every three and one-half to four pounds of milk produced per cow.

Rules for Calf Feeding at Much Lower Expense

Rules for calf raising at lower cost are given by C. J. Fawcett, extension professor of animal husbandry at Massachusetts Agricultural college. "The calf should be taken from its dam as soon as it has a good fill of colostrum milk. Feed whole milk for 10 to 14 days, three to four quarts daily and gradually increasing the quantity. There is no harm in a calf being slightly hungry for the first week. At two weeks, gradually substitute for the whole milk a similar quantity of skim milk made from dry skim milk and water so that in 8 or 10 days the calf will be given skim milk as its entire liquid feed. Mix one pound of dry skim milk with nine pints of water at body temperature. When on full feed the calf will be getting about eight quarts of liquid daily in two feeds."

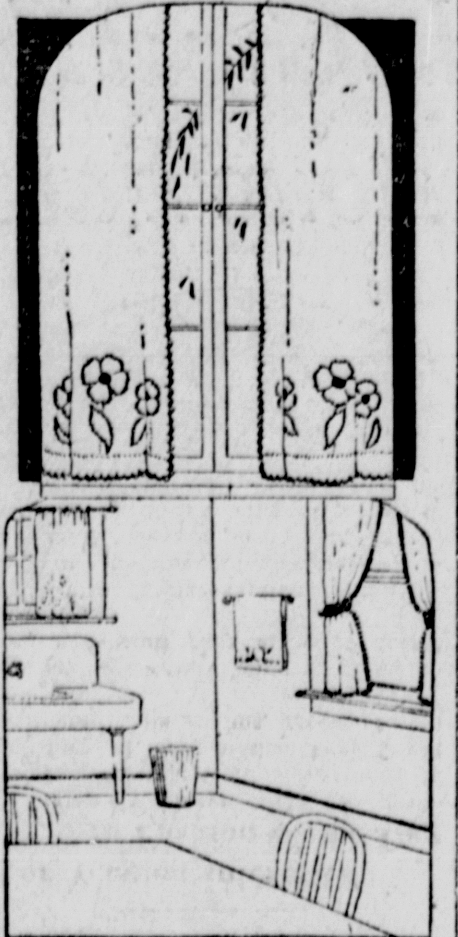

Ropy Milk Cause

Real ropy milk is caused by bacteria and is developed after the milk is drawn from the cow. Such milk when put through a strainer, will form strings several feet long. This milk is not harmful but is bothersome, as it is unsalable and cannot be used for any purpose except possibly win-feeding. The source of the organism is thought to be surface water, and possibly, at times, a diseased udder. Careful sterilization of utensils will eliminate this trouble.

Empty Flour Bags Are Suitable for Curtains

The kitchen has come into its own at last. It is no longer the neglected room of the house, for which anything is good enough and where ugliness is to be expected. In these days of spotless enamel cabinets and work tables, tile floors, pretty painted breakfast sets and even snow-white stoves, the kitchen has become one of the most attractive places in the home. Not the least important item in its furnishings are the curtains.

These should be light in color, attractive in appearance and easily washed. There should always be an extra pair on hand for use in emer-

How Used Flour Bags May Be Made into Attractive Curtains.

gencies. For all except the longest type of kitchen window—and nowadays they are building houses with short, wide windows—a couple of empty flour bags will make as pleasing a pair of kitchen curtains as any housewife could want. The material is soft, closely woven, durable and costs practically nothing. Almost any baker will be glad to sell them for a few cents apiece.

The stamping on the bag is not difficult to remove. Simply cover it with hard or sponk in kerosene overnight, and it is easily washed out in lukewarm water the next morning.

There are several ways to make the curtains that do not make much work. For instance, you might put a border of blue checked gingham on three sides, and make little tie-backs to match. Or buttonhole the sides and bottom with some colored mer- cerized thread and work a simple design in the lower inside corners in outline stitch. Still another suggestion is to have plain hems and up- plique on the bottom or flowers cut out of cretonne.

In finishing the curtains, it is preferable to sew brass rings to the back of the top hem instead of having a casing for the rod. This makes the curtains slide more easily and therefore wear longer.

"Flour-bag" curtains are equally suitable for the bathroom and for the children's room. In this case, decorate the curtains with nursery figures or animals worked in outline or appliqued out of pieces of gingham or chambray from your scrap bag.

For Women Interested in Fashion of the Day

Extremely clever little hat ornaments of maraschino or rhinestones in the form of birds or fish, have bright feathered tails or fins, made of real feathers.

Chenille hats are being worn usually small skull caps made of dotted chenille.

Novelty necklaces other than crystals include those of aquamarine, topaz and emerald; also coral of the palest pink to match the rather indefinite pink expected to be a leader for sports wear.

A printed chiffon evening dress by Moynaux has the center of each of the small flowers that go to make up the design of a single rhinestone.

Hand bags are seldom swung from the wrist, but are held by a strap on the finger or carried under the arm.

A great deal of gray is noticed in and about Paris, not only for sports wear, where it is supreme, but in coats, hats and dresses.

Hosiery remains light and may still be classified as nude, although there are any number of different shades.

A black velvet straightline coat worn at the Autteul races had a silver fox scarf as a band across the back, placed at an angle; and for a collar, another silver fox, worn around the neck, with the head and brush at the back.

Light Fur to Be Used on New Summer Coats

"Featherweight" fur coats for summer wear will be a feature of this year's styles for the ultra fashionable women.

Models of "summer" ermine, displayed at some fur shops, weighs about two and one-half pounds.

Pacific seal promises to be popular this year. It is grayish white, with marble-like markings to spots and stripes.

Classic Evening Dress of White Panne Velvet

This classic evening dress of white panne velvet presented by the Woman's Home Companion has a surprise closing and two godets in the skirt giving the almost inevitable uneven hemline. The belt buckle of rhinestones and rubies effectively carries out the jeweled trimming note.

On Rearing Children from CRIB to COLLEGE

Compiled by the Editors of "CHILDREN, The Magazine for PARENTS"

A child is naturally a creature of joy—a joy unto others and a joy unto himself. Normal childhood should be as far as possible carefree.

Here are some don'ts to remember when bathing the baby:

1. Don't put the baby in the tub before testing the water.
2. Don't add hot water to the bath while the baby is in the bath.
3. Don't wash the inside of the baby's mouth.
4. Don't leave the baby alone for a moment in the bathtub.
5. Don't let the draft blow on him while he is being bathed.

There is no doubt that a child usually feels a serious effect from a broken home. He needs his father's guidance and protection, as well as his mother's tenderness and care. You might as well ask which we could best do without, heat or air. Yet a good substitute is better than a poor parent.

No two children are alike. Parents must try to cultivate in each child the capacities he possesses.

The home must appreciate what the school is trying to do, and aid it to the utmost. The school is a powerful agency for good, but it is only supplementary to the home, which is the most important agency in child welfare. When these two are linked closely in sympathetic efforts at understanding the child and in directing his unfolding, we can accomplish all that it is possible to accomplish in his education.

Are your children developing a sense of responsibility about work, learning not to let play interfere with work, not to shirk, "not to lie down on the job?"

How to present history in a way to make it interesting to children is a matter of greatest importance. It is not merely a question of furnishing the child with entertainment or satisfying his curiosity, but of enlisting his precious ardor in causes which in his maturer years he will be able to further. Present the annals of the past to your children as a living dynamic force, and they will learn to select from it the elements which will help them to grow in strength and nobility.

Do you know that the egg is really two foods instead of one? When Johnnie eats the white and Mary eats the yolk, they will be getting foods as different from each other as figs are from pure cane sugar.

Blue Is Recommended by M. Worth for Sports

Explaining the fundamental reason for the appropriateness of blue for sports, M. Worth said: "By the seaside, to which the smart people now go because the country roads are so crowded with motor cars, blue is the most becoming color. The sky and the sea both seem blue. All the navies of the world dress their men in dark blue. Fishermen usually wear blue. And for women I think it makes them look younger. I have experimented on clients with beige and dark blue, and find that the latter color is not only more youthful, but also more becoming to most women. Beige is a factor in spring colors, for it has been raised to a standard shade—it rivals navy blue."

The DAIRY

MILK PRODUCTION SHOWS INCREASE

During the past seven years the production of milk in the United States has shown a steady and fairly uniform increase, but the production of milk products, although showing increases in most instances, has not been uniform, according to Prof. H. A. Ross, milk marketing specialist at the New York State College of Agriculture at Ithaca.

Since 1920, the manufacture of condensed and evaporated milk has shown the least increase of all important milk products. The combined production of these commodities has increased at the rate of only 2 per cent each year. The production of canned sweetened condensed milk has actually decreased at the rate of 10.5 per cent a year, but this decrease has been more than offset by an increase in canned evaporated milk. Cheese, also, has shown only a relatively small increase during this period.

Creamery butter and ice cream, on the other hand, have increased fairly rapidly. Both of these products are probably more sensitive to industrial conditions than are canned milk and cheese, and the demand for them has been high because of the general prosperity of the urban population during the last few years, Professor Ross says.

Approximately two-thirds of all the milk handled in New York state plants is now marketed as fluid milk or cream, largely in the metropolitan area including New York city. The demand for the semiluxury cream has increased more rapidly than has the demand for milk, but both are increasing at a sufficiently high rate, however, to insure a good market.

Pure Bred Doctrine Has Been Given Big Setback

Perhaps the purebred doctrine has been handicapped somewhat at times by making it too general. A man unfamiliar with good sense in feeding and dairy herd management has no business with an extra good bull any more than a baby has with a costly watch or a motor car. Pure-bred cattle are excellent for those who understand how to handle them, but they may prove of no particular value to the careless manager.

With the right management, the pure-bred dairy sire is the greatest single factor in increasing production and profits. The states which are high in percentage of pure-bred dairy sires are also high in average milk production per cow. As the percentage of pure-bred sires decreases in the list of states the production for the group becomes less. This is the result of a survey made by the federal government.

More Intensive Work in Tuberculosis Control

(Prepared by the United States Department of Agriculture)

A number of states enacted legislation during the past year enabling them to conduct much more intensive work in the control and eradication of tuberculosis of cattle. New states obtaining helpful legal authority were Connecticut, Massachusetts, New Jersey and Tennessee. Among the states obtaining additional legislation, Indiana passed a law requiring that wherever a county adjoins two counties working or having completed area work, such county shall provide operating funds upon the request of the state veterinarian. This is in effect a complete state law, as under it all counties in the state will eventually be required to make the necessary appropriations. At present 59 of the 92 counties in Indiana are either classed as modified areas or working to that end.

Dairy Hints

Free access to water or watering cows at least twice daily will increase the profits from winter dairying.

A loose separator vibrates and mixes the milk and cream. Have the machine level and anchored to the floor.

The amount of milk produced for each cow in the United States in 1916 was 3,700 pounds; in 1921 it was 4,000, and in 1926 it was 4,700 pounds.

The average person is using more milk than he used to, but the number of cows in the country is decreasing each year. The answer is, each cow is producing more than formerly.

Dairying is on its way to become a million-dollar industry in Fort Morgan since their cheese factory began operation last month.

Unclean milk utensils, pitted and rusty separator bowls, unclean or rusty cream cans frequently cause a "metallic" flavor in cream.

While animals of good conformation usually have a large capacity for the consumption of food, as a class they are more efficient in changing what they eat into animal products.

Know Your Sweetheart by His Handwriting

By EDNA PURDY WALSH
Editor, Character Reading Magazine.

Is He Jealous?

Do not confuse jealousy with love. It is born of suspicion, distrust and selfishness. The very suspicious, distrustful person is naturally secretive.

penetrates himself and his writing is combined Sharpness, Lines to Left with all T Bars Close Top of Bar the signs to follow, of selfishness, domineering qualities and lack of taste, he will be dangerously jealous. Closed and looped s's indicate secretiveness, but they may not be combined with other signs of selfishness. They may indicate in some writing an ability to hold the tongue and to conserve money, so be just in your judgment, and look for other signs combined.

An interesting sign of suspicion is an angular, contracted, p, h, m, or n with the tops of the curves squeezed together, with the curve missing at the base.

The more the terminals of words curve back to the left, the more the capitals are wrapped up in themselves, the more self-centered will the individual be. And it is the self-centered person who is jealous, sensitive, suspiciously imaginative. The writing full of sharp, contracted narrow letters is of course more critical than the rounded writing with comparative width between the strokes, but here again, this criticism may be constructive.

Note.—Do not make final judgment until other signs in writing are studied. (Copyright.)

DAIRY FACTS

KEEP ALL MILK UTENSILS CLEAN

While no one food is used more universally than milk, it is one of the most easily contaminated by its surroundings, according to Dr. W. G. Sackett, bacteriologist of the Colorado experiment station, who spoke to the dairy and creamery fieldmen on the harmful effects of bacteria in milk and cream.

In an explanation of how dirt gets into milk, Doctor Sackett stated that even milk coming directly from the udder of the cow is not sterile. Quality and length of time milk will remain sweet depends upon the bacterial count which can be kept down by sanitary conditions and cleanliness. Milk is contaminated with bacteria from dirt, hair, straw or manure falling into the milk from the cow's body or from dust settling into the milk pail. This can be lessened by currying cows to remove loose hair, wiping flanks and udder with damp cloth, the use of pails with smaller openings, and care not to feed cows and stir up dust in the barn just previous to milking.

Cement floors and frequent cleaning of stables are also advocated. The milkster himself may increase the bacterial contamination of milk through lack of personal cleanliness. Doctor Sackett pointed out. He should wear clean clothing, should himself be free from disease and in perfect condition of health.

One of the greatest sources of contamination in milk is dirty utensils. The cracks become full of dirt and filth which can be removed only by scalding with live steam or scalding hot water. Doctor Sackett showed where the bacterial count of milk in a test was increased from 5,000 per c. c. to 350,000 per c. c. merely through dirty pails, strainers, clarifier tank, clarifier, cooler and filter tanks.

Strainers do not take out bacteria, but merely allow them to wash off from the strained dirt into the milk. Aeration does not lower the bacterial count except through effect of cooling. It does remove off odors and "barny" flavors, Doctor Sackett explained. Milk kept at a temperature below 50 degrees Fahrenheit will remain sweet longer than at a high temperature.

Doctor Sackett pointed out the dangers from disease like tuberculosis, septic sore throat, diphtheria, typhoid fever, etc., through milk produced under unsanitary conditions. Pasteurization will kill disease-producing bacteria and is being demanded more and more. Prevention of unsanitary conditions through cleanliness with milk products is very desirable.

Some Good Grain Rations

With Alfalfa and Silage

Some excellent rations that fit in well in a district of Wisconsin where 90 per cent of the farmers are feeding alfalfa hay are presented here:

With good silage—14.8 per cent protein ration composed of 700 pounds ground oats, 500 pounds corn or barley, 300 pounds of bran, 200 pounds of oil meal and 200 pounds of gluten feed.

With poor silage—15.8 per cent protein ration composed of 600 pounds ground oats, 400 pounds corn or barley, 200 pounds of bran, 300 pounds of gluten feed.

When a farmer has good corn silage and good quality mixed clover and timothy hay, try this one:

Three hundred pounds ground oats, 200 pounds of bran, 100 pounds of gluten feed, 200 pounds barley and 200 pounds of oil meal.

Feed one pound of grain for every three and one-half to four pounds of milk produced per cow.

Rules for Calf Feeding

at Much Lower Expense

Rules for calf raising at lower cost are given by C. J. Fawcett, extension professor of animal husbandry at Massachusetts Agricultural college: "The calf should be taken from its dam as soon as it has a good fill of colostrum milk. Feed whole milk for 10 to 14 days, three to four quarts daily and gradually increasing the quantity. There is no harm in a calf being slightly hungry for the first week. At two weeks, gradually substitute for the whole milk a similar quantity of skim milk made from dry skim milk and water so that in 8 or 10 days the calf will be given skim milk as its entire liquid feed. Mix one pound of dry skim milk with nine pints of water at body temperature. When on full feed the calf will be getting about eight quarts of liquid daily in two feeds."

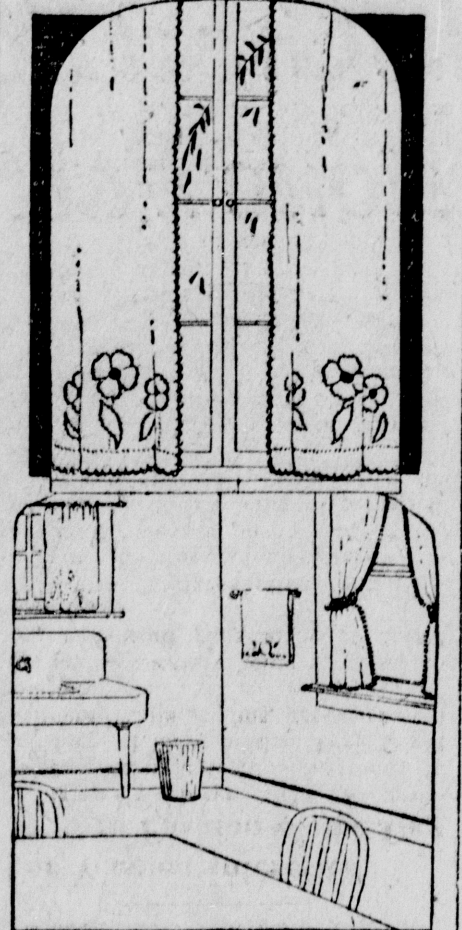

Ropy Milk Cause

Real ropy milk is caused by bacteria and is developed after the milk is drawn from the cow. Such milk when put through a strainer, will form strings several feet long. This milk is not harmful but is bothersome, as it is unsalable and cannot be used for any purpose except possibly win-feeding. The source of the organism is thought to be surface water, an-possibly, at times, a diseased drier. Careful sterilization of utensils will eliminate this trouble.

Since 1920, the manufacture of condensed and evaporated milk has shown the least increase of all important milk products. The combined production of these commodities has increased at the rate of only 2 per cent each year. The production of canned sweetened condensed milk has actually decreased at the rate of 10.5 per cent a year, but this decrease has been more than offset by an increase in canned evaporated milk. Cheese, also, has shown only a relatively small increase during this period.

Creamery butter and ice cream, on the other hand, have increased fairly rapidly. Both of these products are probably more sensitive to industrial conditions than are canned milk and cheese, and the demand for them has been high because of the general prosperity of the urban population during the last few years, Professor Ross says.

Approximately two-thirds of all the milk handled in New York state plants is now marketed as fluid milk or cream, largely in the metropolitan area including New York city. The demand for the semisolid cream, has increased more rapidly than has the demand for milk, but both are increasing at a sufficiently high rate, however, to insure a good market.

Pure Bred Doctrine Has Been Given Big Setback

Perhaps the purchased doctrine has been handicapped somewhat at times by making it too general. A man familiar with good sense in feeding and dairy herd management has no business with an extra good bull any more than a baby has with a costly watch or a motor car. Pure-bred cattle are excellent for those who understand how to handle them, but they may prove of no particular value to the careless manager.

With the right management, the pure-bred dairy sire is the greatest single factor in increasing production and profits. The states which are high in percentage of pure-bred dairy sires are also high in average milk production per cow. As the percentage of pure-bred sires decreases in the list of states the production for the group becomes less. This is the result of a survey made by the federal government.

More Intensive Work in Tuberculosis Control

A number of states enacted legislation during the past year enabling them to conduct much more intensive work in the control and eradication of tuberculosis of cattle. New states obtaining helpful legal authority were Connecticut, Massachusetts, New Jersey and Tennessee. Among the states obtaining additional legislation, Indiana passed a law requiring that wherever a county adjoins two counties working or having completed area work, such county shall provide operating funds upon the request of the state veterinarian. This is in effect a complete state law, as under it all counties in the state will eventually be required to make the necessary appropriations. At present 59 of the 92 counties in Indiana are either classed as modified areas or working to that end.

Dairy Hints

Free access to water or watering cows at least twice daily will increase the profits from winter dairying.

A loose separator vibrates and mixes the milk and cream. Have the machine level and anchored to the floor.

The amount of milk produced for each cow in the United States in 1916 was 3,700 pounds; in 1921 it was 4,000, and in 1926 it was 4,700 pounds.

The average person is using more milk than he used to, but the number of cows in the country is decreasing each year. The answer is, each cow is producing more than formerly.

Dairying is on its way to become a million-dollar industry in Fort Morgan since their cheese factory began operation last month.

Unclean milk utensils, pitted and rusty separator bowls, unclean or rusty cream cans frequently cause a "metallic" flavor in cream.

While animals of good conformation usually have a large capacity for the consumption of food, as a class they are more efficient in changing what they eat into apical products.

Know Your Sweetheart by His Handwriting

By EDNA PURDY WALSH
Editor, Character Reading Magazine.

Is He Jealous?

Do not confuse jealousy with love. It is born of suspicion, distrust and selfishness. The very suspicious, distrustful person is naturally secretive in himself and if his writing is combined with all the signs of jealousy, he will be dangerously jealous. Closed and looped s's indicate secretiveness, but they may not be combined with other signs of selfishness. They may indicate in some writing an ability to hold the tongue and to conserve money, so be just in your judgment, and look for other signs combined.

An interesting sign of suspicion is an angular, contracted, p, h, m, or n with the tops of the curves squeezed together, with the curve missing at the base.

The more the terminals of words curve back to the left, the more the capitals are wrapped up in themselves, the more self-centered will the individual be. And it is the self-centered person who is jealous, sensitive, suspiciously imaginative. The writing full of sharp, contracted narrow letters is of course more critical than the rounded writing with comparative width between the strokes, but here again, this criticism may be constructive.

Note—Do not make final judgment until other signs in writing are studied. (Copyright.)

Babies Love It

For all stomach and intestinal troubles and disturbances due to teething, there is nothing better than a safe Infants' and Children's Laxative.

Mrs. Winslow's Syrup

Keep youth longer!

cleanse the system of poisons

Two of the great enemies to youth and vitality are delayed elimination and intestinal poisons. To keep yourself free from both these common difficulties will help you to stay young.

With the use of Nujol you can do it too. For Nujol absorbs body poisons and carries them off, preventing their absorption by the body. Nujol also softens the waste matter and brings about normal evacuation. It is harmless; contains no drugs or medicine. It won't cause gas or griping pains, or affect the stomach or kidneys. Every corner druggist has Nujol. Make sure you get the genuine. Look for the Nujol bottle with the label on the back that you can read right through the bottle. Don't delay, get Nujol today.
